

Father And Son Die In Chair For Slaying Louisville Lawyer

EDDYVILLE, Ky. (P)—A father and son died in the electric chair today—one still insisting he was cheated by the law.

As Roy Tarrence, 49, entered the execution chamber at Eddyville Penitentiary, he asked the "Lord to bless and keep my wife."

"May God bless you all. May God forgive you all," he said before the black hood was slipped over his face.

When Leonard, 26, appeared, he carried a Bible and a lengthy prepared statement, which claimed the public never heard both sides

in the bludgeoning slaying of a Louisville attorney.

"There will be many a lost soul suffer in hell because of this sentence," he said.

Leonard was still clutching the Bible when the first shock was sent through his body and his last request was that the book be buried with him.

Diet Re-elects Ichiro Hatoyama Premier Of Japan

TOKYO (P)—Ichiro Hatoyama was re-elected Prime Minister late tonight by the New Diet (parliament) after a coalition of rival Conservatives and Socialists defeated his candidates for speaker and vice speaker of the powerful Lower House.

Hatoyama's re-election never was in serious doubt, but former Prime Minister Shigeru Yoshida's conservative Liberal Party teamed up with both right and left wing Socialists to make inroads upon Hatoyama's control of the Diet.

Yoshida thus was repaying in kind the coalition which Hatoyama's equally conservative Democrats formed with the socialists last fall when they toppled the Yoshida cabinet.

Hatoyama received 254 votes. Left Socialist Mosaburo Suzuki got 160.

No Sign Of End In Bell Strike

ATLANTA (P)—The nine-state strike of Southern Bell Telephone Co. workers entered its fifth day today with no sign of a break in the deadlocked negotiations.

Reports of damage to telephone equipment continued. Cables have been cut, shot at, burned or pulled down in seven states since the walkout began Monday.

Union leaders said they were certain none of the striking union members were responsible for cable cuttings. The union has undertaken its own investigation of vandalism.

Company spokesman said 16,500 workers were on the job Thursday, 15 per cent more than Monday. An additional 10,000 supervisory employees handled nearly four-fifths of long-distance business, the spokesman said.

G. F. Gill, district strike director for the Communications Workers of America, disagreed. He said Southern Bell has about 20,000 supervisory employees and declared: "We hear they have been importing strike breakers from other states by plane, train and possibly even by pony express."

"Our men are on strike everywhere, about 95 per cent strong."

A total of 36 cables have been reported damaged in the Atlanta area, and others in Mississippi, Alabama, Kentucky, Florida, Tennessee and Louisiana.

Tulips Peeking Up At Holland

HOLLAND (P)—Early tulip shoots already have had their appearance herald the 26th annual Tulip Time Festival at Holland, May 11-14.

Meanwhile, the offices of Tulip Time Festival, Inc., have been humming for weeks to complete arrangements for the annual celebration which is expected to draw more than 500,000 persons.

The festival, originally a chamber of commerce operation, has been incorporated under a 12-man board of directors. The chamber appoints six directors and the city council names the remaining six.

The 1955 festival is under the direction of manager Earl F. Price and president John J. Riersma.

Officers and the board of directors have released the 1955 festival program. The show begins Wednesday, May 11, with a declaration by Holland's mayor that the business area's streets are dirty and in need of scrubbing.

TODAY'S CHUCKLE

A lawyer was attending a funeral. A friend arrived late, an taking a seat beside him, whispered, "How far has the service gone?"

The lawyer nodded towards the clergyman in the pulpit and whispered back, "He just opened the coffin."

Bonn Parliament Ratifies West German Rearmament

HONORED BY NOTRE DAME—George Meany, president of the American Federation of Labor, was awarded the Laetare Medal for 1955 by the University of Notre Dame. Meany is the first labor leader to wear the medal, which has been awarded annually since 1883 to an outstanding American Catholic layman. It is generally regarded as the most significant annual award conferred upon Catholic laymen in the U. S.

Second Twin Born 48 Days After First

DELAWARE, Ohio (P)—On Jan. 28 one twin was born to Mrs. Bernard Schnees, 35. Thursday 48 days later—the other was born.

Dr. James Parker said the first infant, a girl delivered prematurely by Caesarian section, resulted from normal pregnancy within the uterus. The second, a boy, was from pregnancy outside the uterus, one of less than 200 known cases, he said.

The first child, still at Jane M. Case Hospital, now weighs 5 pounds 12 ounces. The other weighed 5 pounds 4 ounces at birth.

Gunmen Grab \$54,000, Overlook \$90,000 At River Forest Bank

CHICAGO (P)—Four quick-working gunmen scooped \$54,000 from the cash drawers of a suburban River Forest bank Thursday after sending all available police on a wild goose chase.

But the robbers, in their hasty two-minute ransacking of the River Forest State Bank, overlooked another \$90,000 stashed in a cash drawer, bank officials said.

The gunmen, wearing masks and toting one sub machinegun and three pistols, fled in a getaway car driven by an accomplice who had waited outside the bank. They made their escape one minute before the first police squad arrived at the scene.

The bulk of the suburb's police force, including Chief Bernard Gerard, was at a real estate office investigating what turned out to be a phony robbery alarm. To be a real estate office is 17 blocks from the bank, the suburb's most distant point from the bank.

Gerard said he felt sure an accused accomplice of the robbery team telephoned police to divert authorities from the actual robbery scene. The police station is 2 1/2 blocks from the bank. Only the radio dispatcher was on duty when the bank alarm sounded.

Denver Slayer Of 4 Must Die

DENVER (P)—Frank Archina, a 22-year-old immigrant, was convicted Thursday of murdering his mother-in-law and sentenced to die in the state's gas chamber.

Archina, who also shot to death three other members of his wife's family, was tried only on charges of slaying Mrs. Elizabeth Macris, 58, the mother-in-law.

Rose Macris Archina, the defendant's wife, testified against him during a 10-day trial. After the verdict she commented:

"It is what he deserved."

It was on her eyewitness testimony that District Attorney Bert Keating demanded the death penalty.

Mrs. Archina and a sister, Mary, married the Archina brothers in Italy in a civil ceremony. Because the sisters were naturalized Americans, the brothers — Frank and Louis, 24—then entered the United States and resided here with the Macris.

Police said friction developed between Frank Archina and the Macris because the family insisted on re-marriage in a church ceremony.

Bomb Blamed On Reds

NAPLES, Italy (P)—A bomb exploded today in the provincial headquarters of the Fascist Italian Social Movement (MSI). One office room was wrecked but there were no casualties.

A party spokesman blamed the attack on the Communists. Feelings between the two factions have been particularly high since a group of Fascist youths recently smashed a Communist headquarters in Rome.

Yalta Story Bad For Democrats, Capehart Says

WASHINGTON (P)—Sen. Capehart (R-Ind) said today the Yalta papers "will be very very damaging to the Democrats."

He said the newly published documents are filled with political implications which "probably will carry over to the 1956 presidential campaign." But some other legislators, of both political parties, were less positive.

On the international level, Rep. Vorys (R-Ohio) predicted that the disclosure will kill any chance of American participation in a new Big Three conference with Russia.

Vorys said in a separate interview that State Department publication of the 10-year-old record of the Big Three negotiations should have this "profound effect" on future planning:

"It should discourage the people of the United States from wanting to have our leaders take part in any more three or four-power secret conferences such as some of our allies are now suggesting."

British Prime Minister Churchill has periodically talked of a new Big Three conference. British Labor party leaders have strongly urged one.

Sen. Mansfield (D-Mont) said some Republicans will undoubtedly "try to use what happened at Yalta for political purposes."

But the Republican party as a whole, he said, "will have to decide whether to place their country or their party first."

Both Mansfield and Sen. Jackson (D-Wash) said that, with the benefit of hindsight, it appears obvious that former President Roosevelt "made some mistakes" at Yalta, where he conferred with Churchill and Russian Premier Stalin.

But Mansfield said Roosevelt "was guided to a considerable extent by his military advisers."

Beano Hot Topic In Grand Rapids

GRAND RAPIDS (P)—Beano, recently a hot political topic here for 20 years, unexpectedly came alive again Thursday.

It happened while Grand Rapids city commissioners questioned Edward M. Shafter, city manager of Royal Oak who is being considered for city manager here.

Asked about beano by one of the local commissioners, Shafter said beano had been played in years gone by at Royal Oak but citizens there dropped the game on orders of the Oakland County prosecutor.

Grand Rapids mayor George Veldman and Grand Rapids commissioners took keen interest in these remarks because of recent public charges that local city officials allow gambling.

Shafter said the Royal Oak police chief carried the edict of the Oakland prosecutor to leaders of civic organizations and, Shafter said, "not even the churches" now allow beano games at Royal Oak.

Gambling charges figured in the local municipal primary election campaign last month.

Informed of Shafter's statement, Kent County Prosecutor Stuart Hoffus said:

"I have had no formal complaints about beano as a gambling violation since I've been in office and our office has issued no warrants for beano violations."

Atomic Explosives Ready For Use In Pacific, Says Nixon

CHICAGO (P)—Vice President Nixon says the United States has atomic weapons in the Pacific and will use them if necessary.

"Tactical atomic explosives are now conventional and will be used against the military targets of any aggressive force," he said Thursday.

In Chicago for speeches at St. Patrick's Day programs, he also touched on the 1945 Yalta pact.

"I don't believe there actually was any deliberate attempt to sell us out to the Communists," he said in answer to a question after his speech to the Executives Club.

He said there was no doubt that concessions given to the Russians in the pact were detrimental to the United States and the free world.

"The reason the concessions were made was that the leaders of the free world simply didn't know what the Communist animal was like," he said. "Another reason was that we badly needed Soviet support at the time for the conquest of Japan."

The fall of China to the Reds, he said, could be laid directly to the door of the pact, and "of course it naturally followed that we had a war in Korea and one in Indochina."

In posing the threat of atomic retaliation for any aggression in the Pacific, he said:

"It is foolish to talk about the possibility that the weapons which might be used in the event war breaks out in the Pacific would be limited to conventional explosives. Our forces could not fight an effective war in the Pacific with these types if they wanted to."

Asked by a newsmen if such weapons were now cached in the Pacific, ready for use, he replied:

Yes, they are cached in the Pacific.

Legislature Hopes To Wind Up Dispute On Road Program

LANSING (P)—Republican and Democrats in the House will work through the weekend to headoff a further House-Senate dispute over a highway expansion program.

The House Thursday delayed until Tuesday any action on the bill which has been passed by both the House and Senate in different versions.

The Legislature will recess this noon until Monday night.

Rep. Ed Carey of Detroit, the Democratic floor leader, said he would try to line up enough support to kill a mileage distribution formula added by the Senate and to insert a truck license fee increase of at least 15 per cent.

The House originally voted to boost truck fees 25 per cent, but the Senate rejected any increase.

The formula distributing county funds on a mileage basis favors 68 smaller counties at the expense of the 15 more populous counties. It would take more than one million dollars away from the Wayne County Road Commission.

Rep. Emil R. Peltz (R-Rogers City), author of the original House bill virtually junked by the Senate, also wants to put the bill in conference immediately.

Republicans may caucus Tuesday to sound out sentiment.

Schoolboy Gets Life For Killing

DEDHAM, Mass. (P)—Slim, boyishly handsome Peter Makarewicz, 16, of Norwood, begins a life sentence in state prison today for the sex strangling of his school chum and neighbor Geraldine Annesse, 15.

A Norfolk County Superior Court jury deliberated almost three hours Thursday before convicting Makarewicz of the Nov. 4, 1954, slaying in a garage next to the girl's home. He was charged with first-degree murder.

Peter's attorney Louis Goldstein said: "I still believe he is innocent. I will review the record and see if there are grounds to take it to the Supreme Court of Massachusetts."

Peter, calm and stoical during the 10-day trial in which he maintained his innocence, heard the verdict and slumped in his seat and began to cry. His parents rushed to his side. They were crying too.

Spotlight Shifts To France For Treaty Approval

BONN, Germany (P)—The Bonn Parliament completed its approval of West German rearmament today. It was the ninth of the 15 national legislatures which must approve before Germans can put on Western uniforms.

Rearmament prospects improved still more as a Socialist threat of court action weakened. Socialist sources said they doubted they could get enough members of Parliament to sign a petition bringing the controversial Saar agreement with France before the Federal Constitutional Court.

Saar Vote Close

The West German Bundestag (upper house) cast an overwhelming 29-9 vote today for the key Paris treaty ending the Allied occupation and approving rearmament. The Bundestag (lower house) ratified by a similar 2-1 margin Feb. 27.

Because no objection was raised, three other Paris pacts were approved in the Bundestag without a vote. They would permit Allied troops to remain in West Germany and admit the Bonn republic to the seven-nation West European Union and the North Atlantic Treaty Organization.

The final Paris agreement—to put the German-speaking, coal-rich Saar under international control while leaving it linked economically to France—just squeaked through the upper house. The Bundestag vote was 21-17, paralleling the 263-202 approval in the Bundestag.

Waiting For Paris

The Bundestag action put the spotlight squarely on France, whose Senate begins debate on the treaties next Wednesday. The French National Assembly approved the pacts Dec. 30. The final Senate vote is expected next Friday.

Approval also has been given by the parliaments of Britain, Canada, Greece, Iceland, Italy, Norway, Portugal and Turkey. Legislative action still must come in Belgium, Denmark, Luxembourg, the Netherlands and the United States. Their ratification is considered a certainty once West Germany and France complete the process.

Medford Boy Tells How Topsy Father Shot Wife Fatally

MEDFORD, Wis. (P)—Dist. Atty. Raymond Scott said today that after hearing a terrorized 9-year-old boy's sobbed story of drunken brutality, he has filed a murder charge against a farmer who claims his wife was killed by accident.

Scott said he charged Steve Stortekly, 43, with second degree murder to cover a killing that he said, although not premeditated, "certainly evinced a depraved mind."

The Taylor County prosecutor said he acted after young Stanley Stortekly told how his father, after nearly seven hours of steady drinking, forced his 31-year-old wife Julia to dance about their north central Wisconsin farm house by firing shots from an automatic pistol at her feet.

"I want to see you dance," Scott said the child quoted his father as saying before the shooting started.

Scott added the boy described how his father finally shot Mrs. Stortekly twice—once in the leg, once in the abdomen. She walked to a neighbor's for help after the shooting Wednesday night, but died at a hospital Thursday.

University Now 138 Years Old

ANN ARBOR (P)—The University of Michigan celebrates its 138th birthday today, making it twenty years older than the state itself.

But behind today's university were days of struggle and building. Now the university claims more living alumni than any other college or university in the nation.

It's on-campus student body numbers more than 18,000 and its professional schools in law, business, medicine, engineering and others rank among the world's finest.

The first steps have been taken to establish a senior college extension at Flint, and some leaders envision similar extensions to bring university educational opportunities to everyone in the state.

At one time, however, progress seemed pitifully slow. The university was chartered in Detroit in 1817. When Michigan joined the Union in 1837, one of the first acts of the state Legislature moved the university to Ann Arbor.

In 1880, University Hospital, now one of the best in the nation, was in a faculty home. Patients lay on mattresses stuffed with corn husks and straw. It was all part of the then popular notion that hospitals should be constructed and equipped cheaply so that they could be destroyed when they became germ-laden.

Nearly 200 alumni clubs all over the world have planned celebrations, but only one is in doubt: alumni in Taipei, Formosa, have planned a meeting too.

Pay Checks Stolen

NILES (P)—Theft of 500 payroll checks from the National Electric Mfg. Co. was discovered Thursday. A break-in was reported Monday by the company which said then that only a typewriter had been stolen.

SAAR VOTE—The West German Bundestag (upper house) cast an overwhelming 29-9 vote today for the key Paris treaty ending the Allied occupation and approving rearmament. The Bundestag (lower house) ratified by a similar 2-1 margin Feb. 27.

WAITING FOR PARIS—The Bundestag action put the spotlight squarely on France, whose Senate begins debate on the treaties next Wednesday. The French National Assembly approved the pacts Dec. 30. The final Senate vote is expected next Friday.

BEANO HOT TOPIC—Beano, recently a hot political topic here for 20 years, unexpectedly came alive again Thursday.

SCHOOLBOY GETS LIFE FOR KILLING—Peter, boyishly handsome Peter Makarewicz, 16, of Norwood, begins a life sentence in state prison today for the sex strangling of his school chum and neighbor Geraldine Annesse, 15.

LEGISLATURE HOPES TO WIND UP DISPUTE ON ROAD PROGRAM—Republican and Democrats in the House will work through the weekend to headoff a further House-Senate dispute over a highway expansion program.

ATLANTA (P)—The nine-state strike of Southern Bell Telephone Co. workers entered its fifth day today with no sign of a break in the deadlocked negotiations.

REPORTS OF DAMAGE TO TELEPHONE EQUIPMENT CONTINUED. Cables have been cut, shot at, burned or pulled down in seven states since the walkout began Monday.

UNION LEADERS SAID THEY WERE CERTAIN NONE OF THE STRIKING UNION MEMBERS WERE RESPONSIBLE FOR CABLE CUTTINGS. The union has undertaken its own investigation of vandalism.

COMPANY SPOKESMAN SAID 16,500 WORKERS WERE ON THE JOB THURSDAY, 15 PER CENT MORE THAN MONDAY. An additional 10,000 supervisory employees handled nearly four-fifths of long-distance business, the spokesman said.

G. F. GILL, DISTRICT STRIKE DIRECTOR FOR THE COMMUNICATIONS WORKERS OF AMERICA, DISAGREED. He said Southern Bell has about 20,000 supervisory employees and declared: "We hear they have been importing strike breakers from other states by plane, train and possibly even by pony express."

"OUR MEN ARE ON STRIKE EVERYWHERE, ABOUT 95 PER CENT STRONG."

A total of 36 cables have been reported damaged in the Atlanta area, and others in Mississippi, Alabama, Kentucky, Florida, Tennessee and Louisiana.

HOLLAND (P)—Early tulip shoots already have had their appearance herald the 26th annual Tulip Time Festival at Holland, May 11-14.

MEANWHILE, THE OFFICES OF TULIP TIME FESTIVAL, INC., HAVE BEEN HUMMING FOR WEEKS TO COMPLETE ARRANGEMENTS FOR THE ANNUAL CELEBRATION WHICH IS EXPECTED TO DRAW MORE THAN 500,000 PERSONS.

THE FESTIVAL, ORIGINALLY A CHAMBER OF COMMERCE OPERATION, HAS BEEN INCORPORATED UNDER A 12-MAN BOARD OF DIRECTORS. The chamber appoints six directors and the city council names the remaining six.

THE 1955 FESTIVAL IS UNDER THE DIRECTION OF MANAGER EARL F. PRICE AND PRESIDENT JOHN J. RIERISMA.

OFFICERS AND THE BOARD OF DIRECTORS HAVE RELEASED THE 1955 FESTIVAL PROGRAM. The show begins Wednesday, May 11, with a declaration by Holland's mayor that the business area's streets are dirty and in need of scrubbing.

DENVER (P)—Frank Archina, a 22-year-old immigrant, was convicted Thursday of murdering his mother-in-law and sentenced to die in the state's gas chamber.

ARCHINA, WHO ALSO SHOT TO DEATH THREE OTHER MEMBERS OF HIS WIFE'S FAMILY, WAS TRIED ONLY ON CHARGES OF SLAYING MRS. ELIZABETH MACRIS, 58, THE MOTHER-IN-LAW.

ROSE MACRIS ARCHINA, THE DEFENDANT'S WIFE, TESTIFIED AGAINST HIM DURING A 10-DAY TRIAL. AFTER THE VERDICT SHE COMMENTED: "IT IS WHAT HE DESERVED."

Demote, Suspend Police Officer

The demotion of Police Officer Harry E. Wait Jr. and his suspension for one month from the Escanaba Police Department was announced today by City Manager A. V. Aronson.

The demotion is from sergeant to patrolman, and the discipline is in connection with a high-speed chase by Escanaba police patrolmen of a car driven by Wait. The chase occurred at several times between 2 a. m. and 3:30 a. m. Sunday and ended between Escanaba and Gladstone on US-2-41.

Wait was not on duty at the time of the chase, in which he drove a car owned by the Bill Loga Mercury Sales of Marinette, Wis. The car had been brought to Escanaba for demonstration by Donald Paulson, 21, of 1713 13th St. Menominee, a car salesman.

According to the city manager, Wait and Paulson met in an Escanaba restaurant and went for a ride, with Wait driving. When police slowed to warn Wait that he had his bright lights on, he speeded up drove out of Escanaba on Lake Shore Drive.

For the next one and one-half hours the police chased the 1955 Mercury with the Wisconsin dealer plates at various locations in the city. Each time it escaped by speeding out of town. Once it cut through a gas station driveway at Ludington and 23rd St. to avoid the red traffic light.

The chase ended between Gladstone and Escanaba when the Mercury halted and Wait stepped out. A report of the incident was made to Police Chief Jack Finn on Sunday morning, and an investigation was begun by the police chief and the city manager.

The city manager said there was just the two men in the car and that no drinking was involved. Wait is 28 years old, and began work with the police department in May, 1949. The city manager said that Officer Wait's past record has been good.

According to civil service regulations, an appeal from the suspension can be made to the Civil Service Commission within a period of five days, and from the demotion within 10 days.

Bishops' Welfare Fund Collection Planned Sunday

MARQUETTE—Plans are completed for the 1955 Bishops' Welfare and Emergency Relief Fund special collection to be taken up in all Upper Michigan Catholic churches on Sunday, March 20, the campaign office announces.

Some 130 parish and mission units of the Diocese of Marquette will contribute to the fund in special collection envelopes being made available to all parishioners at the March 13 masses.

Last year Upper Michigan Catholics, adults and children contributed \$19,832.85 toward a national goal of five million dollars. The amount was slightly over-subscribed. A similar national goal has been set for the March 20 collection.

"We have every reason to believe that the national goal will again be oversubscribed," the diocesan campaign director stated here today. "The generosity of Upper Michigan Catholics to this cause for world-wide relief of suffering among the war-stricken and refugees has been admirably demonstrated over the past eight years and donations matching last year's contributions are anticipated," Msgr. Spelgatti said.

Since 1947 a total of \$176,925.88 has been collected in Upper Michigan for the work of war suffering relief.

Low administrative costs, less than two percent, the existence of a vast missionary personnel for on the scene distribution of foodstuffs, medicinals and clothing, eligibility for government supplied surplus food items, has enabled War Relief Services, National Catholic Welfare Conference, during 1954, to distribute over 79,341,000 pounds of goods, valued at more than \$18,800,000. This has been distributed without reference to creed or cult and will continue to be so administered, Msgr. Spelgatti said.

Building Permits Approved By City

The city of Escanaba has approved four applications for construction permits, including three for new dwellings, according to City Assessor Charles Schmidt. They are as follows:

Robert E. Meyer, to build a dwelling at 1610 Lake Shore Drive.

Kenneth C. Gustafson, to build a home at 2500 14th Ave. S.

Nick Nastoff, 1414 N. 18th St., to complete the dwelling for which a basement is already constructed.

Edward J. Primrose, 717 Ludington, to construct a new front at his place of business.

PROFIT-SHARING—Lyle Dudley, Lynchburg, Thomas Smith, Leominster, and Bert Goodreau, Escanaba, watch President Howard E. Whitaker

sign the profit sharing check at the Mead Corporation office in Dayton, Ohio.

Mead's Profit Sharing Boosts Retirement Plan

Mead Corporation employees in the company's retirement plan will share in the largest profit sharing check in company history. The record breaking check is based on Mead's operation in 1954. It totals \$1,626,940.52.

President Howard E. Whitaker signed the check in Mead's Dayton, Ohio, office in the presence of employee representatives from all divisions of the company.

Bert Goodreau represented the employees of the Escanaba Division. Besides witnessing the check signing ceremony, Mr. Goodreau inspected the accounting machine installation where the records of all members are posted and calculated. The use of electronic accountants helps insure the handling of members' accounts with great accuracy and in strict confidence.

Profit sharing is an outstanding feature of the Mead Retirement Plan. This year's profit sharing amounts to more than four weeks pay for each member.

Other regular contributions to the retirement plan are made by the company and employees each pay day. The total of all company contributions to the plan during 1954 came to \$2,202,389. Employee contributions during the same period were \$300,646.

Seventy-six men and women throughout the corporation retired under the provisions of the plan in 1954. In the past eight years, 345 have retired under the plan altogether. During 1954, only one employee had to seek the

special benefits of the plan for those who become permanently and totally disabled.

Twenty-four members of the retirement plan died during the year. The plan paid their beneficiaries \$75,190. Of this, \$64,785 came from the company's profit sharing contributions, with the rest coming from the employees' contributions.

Over 4,000 Mead employees are members of the retirement plan. The plan was inaugurated in 1947. Since then, more than \$10,000,000 has been put into the profit sharing trust fund by the company, in addition to its other contributions.

New School Voted

DURAND (AP)—By a better than 6-1 margin, voters have approved a \$250,000 bond issue to finance construction of a new elementary school.

Michigan boasts nearly 30% of the nation's total salt production. Its output of 4 million tons of salt annually is almost twice that of any other state. Production centers near Detroit and Saginaw.

George Dietz, 72, Dies At Home Here

George C. Dietz, 72, an Escanaba resident for over 40 years, died at 6:40 a. m. today at his home, 602 Stephenson Ave.

Born Dec. 19, 1882 at Green Bay, he came to Escanaba over 40 years ago. He was first employed by the Escanaba Woodware Company many years and then worked for the Delta County Road Commission for 26 years. Mr. Dietz was a member of St. Joseph's Church and the Holy Name Society.

Surviving are his wife, the former Josephine Walsh; one brother, Norbert, of Milwaukee, and five sisters, Miss Elsie Dietz, Miss Odelheide Dietz, Mrs. Clem Kaster and Mrs. Otto Kaster, all of Green Bay, and Mrs. Charles Deyckhoff, Fond du Lac, Wis.

Friends may begin calling Sunday at 10 a. m. at the Alto Funeral Home.

Funeral services will be held Monday at 9 a. m. at St. Joseph's Church with Rev. Stephen Schneider, O. F. M., officiating. Burial will be made in Holy Cross Cemetery.

On Old Mission Peninsula near Traverse City, cherry trees grow 20, 000 to the square mile. This is the greatest concentration of cherry trees in America.

Arnold Nelson Dies Suddenly

Arnold G. Nelson, 54, of 50 1/2 Polk St., Oshkosh, Wis., died suddenly as the result of a heart attack today at 1:30 a. m. He had been district agent for the Standard Oil Company for 20 years.

Born in Escanaba Dec. 18, 1900, he had been a resident of Oshkosh for the past three years. Mr. Nelson married the former Elsie Ahlstrom in Escanaba June 18, 1927.

Mr. Nelson was a past master of Delta Lodge, 195, F. & A. M., and a member of Ahmed Temple Shrine at Marquette, Francis M. Moore Consistory, Marquette Shriners Club of Oshkosh, U.C.T. Association and Elks. He also was a member of the First Presbyterian Church.

Survivors include his wife, three sisters, Mrs. Al (Tillie) Olson and Mrs. Victor (Laverne) Anderson, both of Escanaba, and Mrs. Otis (Sally) Manley, Belvedere, Ill., and several nieces and nephews.

The body is being brought to Escanaba to the Anderson Funeral Home.

Funeral services will be held Monday at 2 p. m. at the Anderson Funeral Home chapel with Dr. James Daun of the First Pres-

ARNOLD G. NELSON

byterian Church, Oshkosh, officiating. Burial will be made in Lakeview Cemetery. Masonic rites will be held.

Including production of sand and gravel, Michigan has mineral industries in all but 4 of its 83 counties.

No Bidders On City Shore Lots

Whether the Escanaba City Council will readvertise for sale of seven residential lots on the shore opposite the Athletic Field was not indicated last night when no bids were received in response to the city's first offer of the lots to the public.

Minimum prices per foot had been established by the Council. Most of the frontage was to be sold for not less than \$23 per front foot, and the price on some was \$20 per front foot.

Recommendations against the sale of the shore property had been received by the Council from the Planning Commission, and residents of the area had also petitioned that the frontage not be sold but held for development as a neighborhood park.

Gravel Bids Approved

Five bids were received by the city to supply gravel to the city, and for crushing city gravel. Low bidders approved by the council are as follows:

Steve Marvic, Escanaba, purchase and crushing of 5,000 cubic yards of gravel, \$3,200; and for purchase and crushing of 6,000 cubic yards of gravel, \$3,180.

Bark River Concrete Products and Gravel Co., Bark River, for the crushing of 5,000 cubic yards of gravel, \$3,500.

In other business the Council approved a resolution establishing assessments for a water main extension on 12th Ave. S., but approved certain exceptions to be granted Henry Jamar and the Escanaba Golf Club, property owners in the area.

To Extend Mains

A resolution setting the time and place for voting in the spring election of April 4 was adopted. Salaries of clerks and inspectors at the polling booths will be \$15, and of gatekeepers \$12, the same as the rates in prior elections.

Petitions for the extension of water mains and sewer mains in the Goulais Addition were received by the Council and referred to the engineering department for the preparation of cost estimates. Consideration of a resolution regarding the efforts of Menominee and Frankfort to have a state ferry route established between the two ports was tabled without discussion.

A request by Arthur Arbour of Bay View that he be considered when certain city lands west of US-241 at the north city limits are to be sold was received and placed on file. Arbour notified the city that he would like to purchase 12 acres in area, reaching west to the E. & L. S. Railway, as a site for a light industry.

Recreation Board Approves Budget

The Escanaba Recreation Board last night recommended an operating budget of \$31,537.82 for the City Recreation Department for the 1955-56 fiscal year, beginning July 1. The budget proposal is slightly lower than this year's budget of \$31,763.56.

In addition to funds for operations, the recreation board recommended \$4,325 for area development of which \$575 would be used for seeding the baseball field at the Veterans' playground and for installing two horseshoe courts. The balance of \$3,950 would be used for enlarging the recreation building at Royce Park.

Briefly Told

Stamp Collectors—The Escanaba Philatelic Society will hold a meeting in the city hall council chambers at 7:30 Saturday evening. All stamp collectors are invited to attend.

Restrictions Suspended—Effective at noon today, March 18, road restrictions on state trunk lines in the Upper Peninsula will be temporarily suspended until further notice.

Bark River Lions—The Bark River Lions will hold their regular bi-monthly dinner meeting Monday, March 21, at 7 p. m. in the Salem Lutheran Church parlors.

MARQUETTE COMMUNITY BUILDING—For the third straight year, the Escanaba hockey team will play its championship play-off games in the Northern Michigan-Ontario League at the Marquette Palestra because of lack of a suitable arena and artificial ice surface in Escanaba. Crowds of approximately 2,000 are expected to see Escanaba play Sault Ste. Marie, Ont., in the championship finals in Marquette, a best-of-five series for the Gibson Cup. Escanaba is the defending champion, having defeated Marquette in the semifinals and Houghton in the finals last winter.

The Palestra has an artificial ice surface and a program currently is underway to enlarge and modernize the building to make it a complete community center. The above is an architect's drawing of the completed Palestra in accordance with present plans for improving the building. Preliminary plans and specifications were drawn by the architectural and engineering firm of Harley, Ellington and Day, Inc., of Detroit, the firm which redesigned the Detroit Olympia and which designed the Ironwood and Marquette National Guard Armories.

U. P. Publishers To Get Award For Safety Education

MARQUETTE—Northern Michigan College of Education will issue its first distinguished service awards in the field of safety education on Saturday, April 2, it was announced today by Dr. Henry A. Tape, president of the college.

Dr. Tape said the awards will be made in two categories, one to organizations and the other to individuals.

The organization chosen as recipient of the award this year will be the Upper Peninsula Association of Newspaper Publishers. James G. Ward, Jr., general manager of the Escanaba Daily Press, will accept the award on behalf of the association.

Dr. Tape said individual awards will be presented to Commissioner Joseph A. Childs, East Lansing, of the Michigan State Police, and Ernest P. Davis, Detroit, director of the safety and traffic division of the Michigan Automobile Club.

These awards, the college prexy pointed out, have been granted on the basis of "notable service to the field of and for the cause of safety education," and involve financial support, development of public opinion and technical contributions made to the field of safety education itself.

The presentations will be made at a dinner-meeting to be held in the Lee Hall Ballroom of Northern College, at 6:30 p. m., April 2.

Educators, members of school boards and other interested persons in the field of safety education will be in attendance. Approximately 150 guests are expected at the program.

Cuts Teeth At 56

Icebreaking To Start March 27

The U. S. Coast Guard headquarters office at Cleveland announced late yesterday that icebreaking operation on Green Bay will begin on Sunday, March 27, or earlier if weather conditions force commercial fishing to a halt.

EMC Harvey A. Ellsworth, officer in charge of the U. S. Coast Guard light station at Escanaba, said that recent cold weather has "tightened" the ice on the bays in this area and that ice thickness ranges from seven inches off the point at Escanaba to about 20 inches off Kipling. The ice depth is about 20 inches in the vicinity of Minneapolis Shoal, some 12 miles south of Escanaba.

Much of central and lower Green Bay has broken ice. Should the Coast Guard cutter not be required for work in that area of the bay, it will probably come directly to Escanaba on March 27.

Should ice conditions change and cause fishermen to halt operations in the upper Green Bay area before March 27, EMC Ellsworth is to notify Coast Guard headquarters. The cutter may then be dispatched here at an earlier date.

Engineers To Meet Here Next Tuesday

About 80 professional engineers from the central and eastern parts of the Upper Peninsula have been invited to meet at Escanaba next Tuesday. The gathering has been planned by Wesley Bantz, president, and Lehmann M. Dunn, vice-president, of the Michigan Society of Professional Engineers. They will present the advantages of membership in the society and explain the work of the organization at the national, state, and local levels.

Local arrangements are being made by a committee headed by Russell L. Johnson, of Escanaba. The group will meet at the Delta Hotel and start with a dinner at 6:30 p. m., E.S.T. The meeting is open to persons in training or registered in the different branches of engineering — civil, electrical, mining, etc.—who live south or east of a line extending from Iron River to Marquette.

Also expected at the meeting is the president of the newly-formed Douglass Houghton chapter of the society, which will receive its charter at a program in Houghton on March 21. If there is sufficient interest, Johnson said, the state officers will help form a second chapter in the east half of the peninsula.

More people get more news from newspapers than from all other sources combined.

Obituary

REBECCA ANN BRANSTROM
Funeral services for Rebecca Ann, infant daughter of Mr. and Mrs. Arthur Branstrom of Perkins, were held at 10 a. m. today at the Allo Funeral Home chapel with Father Edward Malloy officiating. Burial was in Holy Cross Cemetery.

JOHN W. SEPPALA

Services for John William Seppala were held at 1 p. m. Thursday at the Finnish Lutheran Church in Rock with the Rev. Amos Marin of Gwinn officiating. Burial was in Rock Cemetery.

The Ladies' Choir, accompanied by William Williamson, sang a Finnish hymn and C. Arthur Anderson, who was accompanied by Mrs. Amos Marin, sang "Near the Cross."

Pallbearers were Matt Viitala, John Laitinen, John Enberg, Arvo Kulkki, Charles Nummelin and Peter Kujala.

Mr. and Mrs. Lauri Seppala of Detroit and Mr. and Mrs. Veikko Seppala of Hazel Park, Ill., were among those at the funeral.

HARVEY H. KELL

Funeral services for Harvey H. Kell, who died of a gunshot wound Sunday, were held Thursday at 2 p. m. at the Zion Episcopal Church, Wilson, with Rev. James Ward, Escanaba, and Rev. J. William Robertson officiating. Burial was made in the church cemetery.

Pallbearers were Oscar Kell, Ivan, Earl and Norman Kell, John Koltay and Gilbert Henderson.

Out-of-town persons attending the services were Mr. and Mrs. Otis Harris, Erie, Mich.; Mr. and Mrs. John Kasbohn, Negaunee; Mr. and Mrs. Ted Smith, Mrs. Nina Bellan and Earl Smith, Merrill, Wis.; Mrs. Alex Creighton and Sally Creighton, Manistique, and Miss Rowena Smith and J. W. Herbold, Menasha.

MRS. WILHELMINA CROSE

Funeral services for Mrs. Wilhelmina Crose, wife of Parker Crose, were held yesterday at 3 p. m. at the Anderson Funeral Home chapel with the Very Rev. Joseph S. Dickson of St. Stephen's Episcopal Church officiating. Bur-

Eskimos Prefer Warm Ice Cream

WALLA WALLA, Wash. (AP)—One of the things junior high school pupils learned in an exchange of letters with children of Kotzebue, Alaska, is that "Eskimo ice cream" has neither ice nor cream in it. "Eskimo ice cream is made of caribou fat, seal oil, fish sometimes and berries or raisins and other fruits," wrote one of the children in the remote Eskimo village. "Sometimes no fish and put in fruits like cooked apple. But it's not cold; anyway you could freeze it and eat it."

Editorials—

Secret Papers Of Yalta Failed To Reveal Any Major Surprises

PUBLICATION of the Yalta papers, held in secret for 10 years, failed to develop anything of major significance that was not already known in the Churchill-Roosevelt-Stalin conference of 1945. The effects of the decisions made at that time have been evident for most of the postwar years. The concessions made by President Roosevelt to Stalin at that time in order to bring Russia into the war against Japan are the cause of many of our difficulties today in the Far East.

As the events developed following the Yalta agreement, it became obvious that the price we paid for Russian intervention in the Pacific war was tremendous. Certainly it was far out of proportion to the

part the Russians played in that war. However, we are prone to look back on these events in the light of today's knowledge. We know now that the Yalta agreements were had from the American viewpoint. But at that time we were still fighting a two-ocean war. Germany had not yet been defeated. Japan was still a potent enemy in the Pacific and we were paying a heavy price in pushing back both of these enemies.

The development of the atom bomb was the instrument that made a complete change in the war picture in the Far East. Germany surrendered in May, 1945. The United States dropped the first atom bomb on Hiroshima Aug. 9, 1945. Three days later Russia entered the war against Japan.

We know now that we did not need Russia's help against Japan. Actually we received no help from Russia in the Pacific battleground because Japan surrendered on Aug. 14. It was the fear of more atom bombings that forced the Japanese surrender, not the Russian entry into the war.

To a major degree the concessions that we made to Russia at Yalta provided the springboard for China to fall into the Communist sphere. The northern Pacific islands that we gave to Russia constitute a dagger thrust at the heart of Japan. It is an ironical development because the United States has assumed the responsibility for protecting Japan.

The Korean war was an outgrowth of our concessions to Russia at Yalta. In the light of all these developments, it is not surprising that we look back upon the Yalta conference and get a deep burn about our diplomacy in those discussions. But it must necessarily be a backward look.

Weird Virtue

WORD comes that Douglas Stringfellow, the ex-Congressman of Utah who confessed last year he had faked a glamorous war record, is now lecturing on morals.

We haven't heard how he's doing, or what kind of audiences he's drawing. But it wouldn't be surprising to learn that he's getting good crowds. Americans have a peculiar fondness for people who are wrong before they are right.

We would be quite chagrined, however, if we were ever to hear that Harvey Matusow, the self-confessed "ex-Communist" liar, had managed to make one more dollar on the lecture platform. He found being wrong so exciting and attention-getting that he evidently decided to make it a permanent way of life. But it is doubtful that he merits the spotlight every time he confesses a new batch of sins.

It's one thing to forgive error, as Americans may be doing when they listen to Stringfellow. It's another to endow it with a kind of weird virtue by following a man like Matusow with pencil and pad as he makes his endless trips to the confessional.

A Massachusetts man threw away half an orange and with it went his lower dental plate. The other half should make good gumming.

Try And Stop Me By BENNETT CERF

Two Scotchmen were walking down a lane near Aberdeen (where else?) when one stopped and said, "Jock, there's something jingling in your pocket. Don't tell me it's money." "I couldn't tell you that," admitted Jock, "because it wouldn't be true. The jiggling is the wife's teeth. There's too much eatin' goin' on in my house 'tween meals."

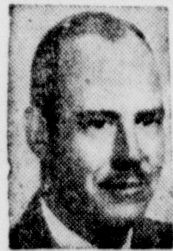

"One day a lion caught me unawares without my gun," admitted an intrepid explorer, "but I just sat stock still and outstared him. The beast didn't so much as touch me."

"Incredible!" marvelled his dinner partner. "How do you explain that?"

"One reason," mused the explorer, "may

have been that I was sitting on the highest branch of a very tall tree."

The Doctor Says . . . Addison's Disease Is A Rather Rare Disorder

By EDWIN P. JORDAN M. D. — Written for NEA Service

A letter from Mrs. L. states that her brother has been told he has Addison's disease, and a communication from Mrs. C. states that she has this condition herself. Both ask for a discussion. This is somewhat difficult because exactly what happens is hard to explain and the treatment is both highly technical and must be most carefully adjusted to the individual victim.

The disease arises from small glands lying next to the kidneys called the adrenal or suprarenal glands. These glands have a rather complicated structure. They belong to the glands of internal secretion. They contain several kinds of cells which form hormones which flow into the blood. A chemically prepared substance called epinephrine or adrenalin has some of the actions of the adrenal gland; cortisone is perhaps the best known of the hormones produced by the adrenals.

COMPLETE REST in bed and protection from chilling and muscular exertion is necessary in acute stages. Those who have mild cases of chronic insufficiency of hormone production may do well when they are given an excessive amount of ordinary salt—sodium chloride—at the same time that potassium, another chemical, is kept low.

Addison's disease is fortunately, a rather

er rare disorder. It received its name from a famous English physician, Thomas Addison, who first described the condition in 1855, and has been a subject of great interest and concern to physicians ever since.

ADDITION DESCRIBED the characteristic symptoms as anemia, languor, or general weakness, feeble beat of the heart, irritability of the stomach, and a peculiar brownish change in the color of the skin. General weakness is particularly characteristic and the deep yellowish brown color of the skin, which is due to deposits of pigment, is also usual. Most patients lose weight. Patients with Addison's disease have a low blood pressure and examination of the blood by chemical tests will reveal changes which clinch the diagnosis.

MANY PATIENTS are given another chemical related to the secretion of the adrenal gland. This has the lengthy name of desoxycorticosterone. Today this is usually combined with doses of cortisone. At all times it is necessary to watch carefully for signs of under or overdosage. Nevertheless it is certain that real improvement has taken place in the management of patients with this curious disorder.

Today In Washington

By DAVID LAWRENCE

WASHINGTON — Efforts are being made by the Communists to scare the American people in order to force the government here to abandon all further tests in developing atom bombs.

Evidence of a world-wide propaganda is accumulating. Many persons are innocently being duped by it and some well-meaning scientists and other persons are playing the Communist game unwittingly by exaggerating the importance of radioactive substances known as a "fall out."

The truth is there isn't the slightest proof of any kind that the "fall out" as a result of tests in Nevada has ever affected any human being anywhere outside the testing ground itself. So, if the people of this country haven't been injured in any way, it is obvious that any tests held in America couldn't possibly hurt anyone in Europe or Asia.

Yet reports keep coming in from other countries which alarm people when printed. Thus, over the last week end, the following news dispatch came from Paris:

"French weather experts said today a huge radioactive cloud resulting from the 'big shot' American atomic test blast in Nevada now is over Greenland and is expected to reach Scandinavia by Monday. They described the cloud 'as large as Spain and France together.'"

MAKE BIG CLOUDS

Now, at the same time the French "weather experts" were being quoted, there was information available officially in Washington from our own weather experts to the effect that the entire amount of concentration of radioactive particles as a result of the last test was far below anything that could affect human beings.

Certainly the atomic tests produce big clouds. That's always been true. But every time there is a test it is also to be noted that press reports quote various scientists distant from the area who express great fears. Thus, the other day some scientists in Colorado claimed there had been some adverse effects, but nobody here in government found the slightest basis for that claim and indeed there is considerable puzzlement as to why these scientists—who know better—made any such comments.

It is true that there are some scientists in all countries who don't want America to develop the hydrogen bomb further or any other bombs. They throw up their hands in horror over such use of scientific knowledge, but it is curious that some of these same scientists made no such protests when the United States was building an atom bomb to use against the Hitler-Japanese alliance.

What is even more inconsistent is the drive being made against American tests when there is no knowledge among American scientists whatsoever concerning Soviet tests.

The Soviet propaganda has been persistent in an effort not only to discredit the American atom-bomb tests but to frighten the people of this country so they will bring pressure to bear on the government to destroy all the atomic weapons and hydrogen bombs now in the stockpile. Naturally the Soviets would like, through their "cold war" tactics, to achieve a superiority and lead in the atomic race which they do not have today. They would be given such a lead on a platter if the American government stopped the study of atom bombs with its series of tests.

A CLEVER RUSE

The Communists have hit upon a clever ruse. They keep talking about the American atomic tests in terms of the ill effects of radioactive substances on the future of the race, particularly with reference to the ability of men and women to have children if they are affected by the "fall out." There is no evidence, however, that at Hiroshima any such results occurred. Even assuming that persons in the "fall out" area up to 140 miles away from a bombed target during wartime were affected in that way, it would be one of the least of the consequences, because everyone knows that anyone who is caught within that area would be lucky to get out alive anyway.

So the official information adds up to the fact that there isn't any proof whatsoever that radioactive substances or "fall out" derived from a test bomb affected anyone more than a few miles from the testing place.

"It is important to recognize," says an official statement by the Atomic Energy Commission, "that the average amount of radiation exposure received by residents of the United States from all nuclear detonations to date has been about the same as the exposure received from one chest x-ray. The commission's medical and biological advisers do not believe that this small amount of additional exposure is any basis for serious concern at this time."

The Communists nevertheless are counting on gullible Americans to believe everything—including the claim that weather changes are due to atomic-bomb tests—but there isn't a shred of truth in any of it.

20 YEARS AGO

Escanaba—Miss Agnes Chandonnet, in company with Miss Alida Dupont, left Thursday for the southland. They will stop over at New Orleans, Miami and Jacksonville, before returning.

Hold On, Folks, We're Going Around A Corner!

Jack Stone's Habit Is Saving Lives; Five In Eight Months

MODESTO, Calif. —(NEA)—

Saving lives has gotten to be a wonderful habit with Jack Stone, fire chief of Modesto. When he fished four-year-old Wanda Horton out of an irrigation canal last year and revived her with artificial respiration, it was his fifth lifesaving act in eight months.

Five days earlier Stone had revived a woman who had fallen into the same canal. The winter before, he had restored breathing for three members of a family overcome by gas fumes from an unvented stove.

As a result, Stone topped the 1954 recipients of the American Red Cross Certificate of Merit. The awards go to persons trained in Red Cross techniques of first aid or water safety who perform lifesaving acts by use of these methods.

Since 1910, when Red Cross first a.d. instruction began, 10,000,000 certificates have been issued for completion of junior, standard, advanced, and instructor courses, according to A. W. Cantwell, national director of Safety Services for the Red Cross.

A total of 10,000,000 certificates in swimming, lifesaving, small craft, and water safety instructor training have been issued since 1914, when the water safety program started.

Last year, 163 Certificates of Merit were awarded. Men and boys outnumbered women and girls more than five to one, but the youngest was a girl, nine-year-old Joyce Neylon of Stockton, Calif. She plunged into a river and rescued a five-year-old playmate.

Another heroine was Marilyn Baker Haar, 18, of Savannah, Ga. She was one of a party of five whose motorboat overturned in the Atlantic, trapping its companions in the below-decks compartments with only inches of breathing space above them. She pulled out her four companions, supported two in the water because they could not swim, and instructed all four to cling to the capsized boat until rescuers arrived.

Barbara Edwards, 14, of Crofton, Pa., heard cries from a neighbor's yard. She ran outdoors to discover that Jimmy Wert, 19 months old had fallen head first into a large pickle crock filled with water. Barbara, remembering her first aid training received in school a year before, promptly applied artificial respiration and restored the child's breathing.

D. L. Fletcher, 20, Nebraska telephone lineman, was placing a cross-arm on a telephone pole near Omaha when a broken insulator released a high-tension line. The wire fell on Fletcher, stunning him and burning him severely. He was suspended from the pole unconscious, held only by his safety strap.

His foreman, John D. Hodges, 44 climbed the pole and, working within inches of the fearful wire, lifted the 190-pound Fletcher to his shoulder. He then released

CHIEF JACK STONE IN ACTION: Five days after he pulled Mrs. Tommy Bingle out of a canal and revived her while her husband (left) watched, he saved a girl at the same spot.

the unconscious man's strap, laid him across his own safety strap, brought him to the ground, and immediately applied artificial respiration.

Several of the certificate recipients were credited with preventing accident victims from bleeding to death.

One was Sister Mary Geraldine of the Order of Notre Dame, teacher in a parochial school in

BARBARA EDWARDS: Out of a pickle crock, respiration.

Beverly, Mass. When a pupil accidentally thrust his hand through a glass door, severing an artery in his wrist, she applied a tourniquet made of a necktie and a ruler to control the bleeding.

At White Sulphur Springs, W. Va., Mrs. C. E. Hanna was standing on a table, hanging curtains. The table collapsed, and Mrs. Hanna, in falling, thrust her arm through the window, severing an artery.

Her cries attracted Howard Southern, X-ray technician, who came to her assistance. He controlled the bleeding, put Mrs. Hanna in his car and drove her to a hospital.

Edson In Washington

By PETER EDSON

(NEA Washington Correspondent) WASHINGTON—(NEA)—After his first two months in the Upper House of Congress, Sen. Norris Cotton (R., N. H.) makes this comment:

"I am beginning to think that being in the Senate is like being in a steel mill. You had better spit on anything you are about to sit on. It may be hot."

WHAT SHE CLAIMS to be an untold story on Republican House Leader and Former Speaker Joe Martin of Massachusetts has been revealed by Bertha Adkins, assistant to GOP Chairman Leonard Hall.

The story goes back to Franklin D. Roosevelt's days. Martin, as House minority leader, was called to the White House for a legislative conference. But when he got to the gate he discovered that he had left his White House pass home.

A new guard on duty didn't recognize Martin and wouldn't let him in on his Elks' membership card, the only other identification Mr. Martin had on him at the time. But just then one of the Democratic leaders came along. He vouched for Martin and the two went in together.

The story got to the President, however, before the conference began. "Say, Joe," he cracked as Martin entered his office, "how did a Republican like you manage to get in here?"

Shot back Martin: "I used my Elks card."

WHEN SECRETARY of Commerce Sinclair Weeks swore in Louis S. Rothschild as Undersecretary of Commerce for Transportation, the secretary said to his new assistant, "You know, Louis, this is getting to be a habit with us."

"Yes, and let's not break it," replied Rothschild.

Weeks was referring to the fact that this was the third time in two years they had gone through the hand-on-the-Bible routine. Weeks first swore in Rothschild as head of the Inland Waterways Corporation—which he promptly sold and liquidated, ending his job. Weeks then swore in Rothschild as head of the Maritime Administration.

DAPHNE ROBERT LEADS, assistant U. S. commissioner of patents, recently addressed a large, all-male group of chemical engineers. She is an attorney and is rated one of the nation's top experts on trade-marks. In addition, she is a noted hat designer and a very attractive woman.

When she was introduced, the chairman said:

"And now I present the person with the best trade-mark you can have—charm and good looks."

SEN. ROBERT S. KERR (D., Okla.) is thinking about converting one room in the basement of his Washington home into a family bomb shelter. He got in touch with Civil Defense Administrator Val Peterson, who suggested the installation of a shield of lead as the best protection against atomic radiation.

When the senator let it be known that he lives within a few minutes drive of both the Capitol and the White House, however, Peterson came up with another plan. According to Kerr, the CDA head exclaimed:

"Brother, if you get an advance warning of enemy planes headed towards Washington, all I can say is that you'd better grab your family and start driving."

SEN. ALBEN W. BARKLEY (D., Ky.) delivered his maiden speech as a freshman senator the other day.

For the former "Veep" to have said nothing for nearly two months was in itself something of a record. The usually jovial Kentuckian admitted that he wasn't very happy.

"I regret that my first utterance in the Senate since my return to it should revolve around a raise in salary for members of Congress," he began. He then went on to state his opposition to that part of the bill which would give congressmen expenses for five round trips a year to their home states.

"It might well constitute a temptation for more absenteeism in the Senate," exclaimed Barkley. "I believe that would be deplorable."

"When our constituents look down on a practically empty chamber and go away with no explanation for the small attendance on the floor, I wonder what their impression of this great body may be. I have often been chagrined and sometimes humiliated because of the meager attendance on the floor of the Senate when important business was under consideration."

We always admire the will power of a man—until it runs into the won't power of a woman.

We can think of two good reasons for digging down come spring—to have home-grown vegetables and to invest in government bonds.

A California plumber collected a bill nine years old—proving they don't forget everything.

Iron Mountain Flier Tells Of 3 Days Cn Raft In Pacific

IRON MOUNTAIN flier—ever wonder what it would be like to catch an airplane over shark-infested waters and drift aimlessly for three days with your finger plugging a hole in a leaky raft?

William C. Pavey, 32, Iron Mountain, was a crew member aboard a twin-engine Navy amphibian plane which was forced down in the Central Pacific. In a recent letter home to his parents, Pavey gave a startling account of his ordeal beginning Jan. 19. He wrote, in part:

"Within the first hour five of us were violently seasick, including myself. Later we inflated a balloon with hydrogen and connected it to the radio antenna and then began to send out distress signals on our 'Gibson Girl' emergency portable transmitter. We cranked until dark.

Hole Gets Bigger

"Shortly after dark, we heard a bubbling noise and found a leak in the raft. We began the ordeal of keeping our fingers pushed into the hole to keep the air in and prevent the leak from enlarging. Three of us took turns for about 45-minute shifts each.

"As time passed, the hole enlarged and we had to use two fingers to fill the gap.

"During the second day x x x a collection of sharks began swimming around the raft. They became vicious when they get the scent of blood. Knowing this, we kept our hands out of the water if they had any cuts or bruises. The sharks would continually ram the bottom of the raft with their dorsal fins, or noses.

Metal Boat Dropped

"We rode out the second night

pretty well done in with exhaustion and exposure. The following day we inflated the remaining balloon, sent it aloft and began grinding out distress signals once more.

"At about 11:30 a. m. the third day, I spotted the Navy Privateer plane sent out to search for us. I let out a warhoop and we sent up smoke flares and dropped dye markers into the water.

"Within 15 minutes there were four planes on the scene and a 30-foot metal boat with supplies in it was dropped for us.

"It took us three minutes to leave our raft and get into the boat. We just collapsed and for 30 minutes were practically unable to move. Five hours later we were aboard and in a ship's sick bay. But it took a lot of praying before we got there."

Lighthouses Now Mostly Automatic

HART, Mich. (AP)—Automation is gradually succeeding the lonely lighthouse keeper along the treacherous spots of Michigan's Great Lakes shoreline. The latest lighthouse to become fully automatic is that at Little Point Sable on the Lake Michigan shore. The keeper, Henry Vavrina, has been transferred to the Big Point Sable lighthouse at Ludington.

The 100-foot tower and buildings of the lighthouse were erected in 1874. And for the last 80 years its kerosene mantle type light has been a warning beacon to ships as far as 17 miles out on the lake.

The old lighting mechanism is being replaced by more powerful, fully automatic electrical equipment.

CONTRACT BRIDGE

By Josephine Culbertson

North dealer.
North-South vulnerable.

<p>♠ A K 8 4 2</p> <p>♥ 7 6 3 2</p> <p>♦ A 9 6</p> <p>♣ 9</p>	<p>♠ J 5</p> <p>♥ K J 10 4</p> <p>♦ K Q J</p> <p>♣ 10 8 7 5</p>
---	---

The bidding:

North	East	South	West
1♠	4♣	6♦	Pass
Pass	Pass		

though South would have an excellent chance for a vulnerable slam—as indeed he did have.

West should have opened a trump, since he was void in clubs and had considerable strength in dummy's spade suit, but he elected to lead a low heart. Winning with the blank ace, South laid down the ace of clubs—and, apparently forgetting all about East's original bid of four clubs, South was shocked to see West ruff. West now led a trump and South was helpless.

In view of East's shutout bid and in further view that West hadn't led a club, thus strongly implying that he didn't have one, South should not have treated his own club ace so cavalierly. The right play at Trick 2 was a low club. Even if East had a trump, he could remove only one of dummy's diamonds, and this would let South ruff two low clubs in dummy. He would discard one club on the spades and, after drawing trumps, finally cash the club ace for the fulfilling trick. The crucial point was to keep West from killing that club ace by a ruff.

South (according to his own statement after the play) was tempted to double four clubs for business, but East-West weren't vulnerable and it looked as

Matero-Puro

CHATHAM—Miss Nancy Matero, daughter of Mrs. Lempi Matero, Eben, became the bride of Isaac Puro, son of Mr. and Mrs. Arvid Puro of Rumely, at a ceremony performed by Rev. Huittala at Marquette March 5.

Attendants for the couple were Miss Carolyn Johnson, maid of honor, and Donald Hakala as best man.

The newly-weds will reside at Eben.

Extension Club

The lesson, "Living Together with the Teen-Ager", was presented by Mrs. Norman Rebard and Mrs. John Maki at a meeting of the Small Towners Extension club at the home of Mrs. William Lentula, Eben.

During the meeting, motions were made to donate \$16 for the children's film library at Morgan Heights Sanatorium, to purchase six sheets to be given to Bay Cliff Health Camp, and to purchase a gift for a local shut-in, Walter Piipo, seven year old son of Mr. and Mrs. Walter Piipo Sr., Chatham.

Plans were made for a dinner party to be held Friday, April 18, with Mrs. Alex Alto and Mrs. Norman Rebard as chairmen. Mrs. Waino Maki and Mrs. Ed Tyner are to attend the program planning meeting at the U. P. Experiment Station.

At the close of the evening, lunch was served by Mrs. Lentula and Mrs. John Maki.

Texas Scores Another 'World's Biggest'

The world's largest vehicle on rubber tires, a truck so big it can carry ten freight vans piggyback, will soon be doing just that across frozen snow trails in Alaska. The 274-foot transporter, called the LeTourneau Sno-Freighter, is powered by 24 electric wheels, each with a motor in its rim. Electricity is fed to the wheels from diesel-electric generating sets in the power-control car. For better maneuverability, the Eno-Freighter is coupled

together in six sections, each with a 25-ton capacity. And its operator needn't worry about catching cold or being blinded by snow-reflected sun rays, as the control car is insulated and its double-walled windows are tinted. He won't miss Alaska's snowy scenery, either, as the control cab is 17 feet high, providing a view all around the horizon. The huge carrier uses low-pressure tires, 88 inches in diameter, for traction.

The giant LeTourneau Sno-Freighter hauls a test load of pipe over rough terrain in Longview, Tex., where it is manufactured. Because the wheels reinforce each other—front cars pulling and rear cars pushing—the transporter can climb steep grades with a full load. Insert shows the control car which supplies the electric power to the giant's 24 wheels.

Houghton Friday evening to attend a basketball game. Mr. and Mrs. Walter Kallio of Detroit were recent visitors at the Kallio home.

Mr. and Mrs. Matt Pokela re-

cently returned from Brantwood, Wis., where they attended the funeral services of Mr. Pokela's sister, Mrs. Matt Kaartenin.

Power Advisory Group Dissolved

The Escanaba Power Advisory Committee, at the request of its chairman, Robert Losse, was dissolved last night by the City Council with expressions of appreciation for its service.

Mayor Harlan Yelland announced that he had received a communication from Chairman Losse requesting the release of the committee, Councilman Robert E. LeMire cited the "grand job" done by the committee in moving for dissolution of the committee. The motion was supported by Councilman Edward J. Cox. Mayor Yelland voiced the thanks and appreciation of the Council for the committee's work in studying and reporting on, electric power proposals.

In other business the Council authorized City Manager A. V. Aronson to invest marine and gas plant insurance funds in government bonds, to earn interest.

Rate Negotiation
Mayor Yelland reported an explanation of the negotiations between the city and the Upper Michigan Power & Light Company, subsidiary of Mead Corporation, in connection with the Power & Light Company's petition to the Public Service Commission.

The city purchases power wholesale from the Power & Light Company under a contract claimed to be invalid by the Power & Light Company. The Power & Light Company also requests the Public Service Commission to establish a higher rate for the power bought by the city.

Mayor Yelland said the city attorney has recommended that the City Council negotiate with the Power & Light Company, noting that it is "somewhat better to negotiate than to go on to the bitter end." Regardless of the power source in the future, the city will not make so much profit, the mayor said.

Effect On Budget
The city is concerned with progress of the rate case because of the possible effect on the city budget. Should the city be ordered to pay a higher rate for power, the profit to the city's general fund from the electric utility would be reduced, possibly in the middle of the fiscal year, the mayor said.

Councilman Edward J. Cox noted that he believes the power contract to be valid, and that the contract has been held to be valid by the late Attorney General Herbert J. Rushton and the late Justice of the Supreme Court Louis Fead.

A tourist liquor license was approved for the Stone House. The license is for an 8-month period.

THOSE IN UNIFORM

Army Pvt. Alger H. Strom, whose wife, Mary Ann, lives at 1705 Ludington St., Escanaba, Mich., recently arrived in Alaska and is now serving at Fort Richardson, Alaska. Pvt. Strom entered the Army in October 1953 and received basic training at Fort Leonard Wood, Mo. He is a 1951 graduate of Gladstone. Strom was employed as a clerk at the Northwestern Veneer & Plywood Corporation before entering the Army. He is the son of Mr. and Mrs. A. W. Strom, 601 N. Ninth St., Gladstone.

Pvt. Alfred K. Sturgeon, son of Mrs. Margaret Sturgeon, 118 Chestnut St., Munising, Mich., recently arrived in Alaska and is now a member of the 42d Engineer Construction Battalion. Pvt. Sturgeon, a 1954 graduate of William G. Mather High School, entered the Army last October and was previously stationed at Fort Leonard Wood, Mo.

M/Sgt. Robert Harris, son of Norman J. Harris, Route 1, Gladstone, Mich., recently participated in Exercise Roundup, an Army training maneuver in Austria. Harris, an intelligence sergeant in the 11th Anti-Aircraft Artillery Battalion's Headquarters Battery, entered the Army in 1948 and has been overseas 15 months. His wife, Ardis, is with him in Austria.

Word has been received from A/3C Dennis T. Ladouceur, Dental Technician, U. S. Air Force, that he has arrived in Munich, Germany. Dennis is the son of Mr. and Mrs. Pete Ladouceur, 1524 S. 8th Ave.

Over twenty sparkling blue lakes can be seen in a glance from the twin observation towers of the Irish Hills near Detroit.

Realtors Boost Upper Peninsula As Good Location For Industry

DETROIT (AP)—Industries pointing toward "more efficiently serving the vast midwest and northwest markets" were told today they could "profit handsomely during the next decade" by building in Michigan's Upper Peninsula.

The advice came in a report by the Michigan chapter of the Society of Industrial Realtors on an Upper Peninsula survey.

It described the Upper Peninsula as one of the few remaining "industrial location frontiers in a good general marketing area," and said that its low humidity weather was "healthful and invigorating" and an industrial asset.

Tremendous Market
"Within 500 miles of the Upper Peninsula," the report said, "are 50 million users and consumers of a wide variety of manufactured products—a tremendous market, easily reached."

Cooperating with the Society of Industrial Realtors (SIR) in its survey were the U. S. Department of Commerce, the Michigan Economic Development Department and the Upper Peninsula Development Bureau. It is entitled: "Industry Location Advantages of Michigan's Upper Peninsula."

The report says that "the most numerous industrial opportunities" are for those industries which would utilize "the area's considerable natural resources of forest products, farm crops and minerals."

Many Opportunities
It listed as available minerals: limestone, dolomite, feldspar, andalusite, talc, asbestos, iron oxide, lake clay and lake sands, as well as copper.

"These opportunities," it says, "include increased lumber manufacturing and greater use of veneer logs now being shipped out."

It adds: "There could be future possibilities of petro-chemical industries resulting from the crude oil line now traversing the area."

The report continues: "Industries such as light metal manufacturing, electronic and scientific instruments and other fab-

rications requiring skillful, capable workers have good opportunities."

"Any additional technical manpower needed for these would be attracted by the area's excellent living conditions."

Good Productivity
"One of the most important single industry location advantages of the Upper Peninsula is the character of its residents. Their records in many diverse industrial employments show a high worker productivity—10 to 15 per cent above that of other areas—an adaptability to changing production methods and excellent attitudes toward their jobs."

Turning to the Upper Peninsula's weather, the report said that "the climate throughout the year is healthful and invigorating," and added:

"Stories on weather endeavor to portray the unusual. Consequently the occurrence of an occasional low winter temperature or a heavy snowfall in the Upper Peninsula is read and interpreted with considerable misunderstanding."

"Temperatures are moderated by the bordering Lakes Michigan, Superior and Huron, and these large bodies of water also insure the absence of smog or other forms of air pollution."

Pleasant Surroundings
It compared average July and January temperatures of several industrial cities with that of the Upper Peninsula. It showed the peninsula's average July temperature was a cool 65.1. Its January average of 14.8 compared with 13.1 for Minneapolis, 25.5 for Detroit, 20.6 for Milwaukee, and 25.3 for Chicago.

Some of the high productivity of

Upper Peninsula workers was credited to the region's "pleasant surroundings and recreational facilities."

The report said the peninsula is well covered by 23 newspapers and 10 radio stations, with 16 television channels having been assigned the area.

Plenty of Water
On the question of water, a scarcity of which has hindered industrial development in some other areas, the report says:

"In this period of growing concern for adequate water in so many areas of the country, the unlimited quantity and top quality of the Upper Peninsula supply is of prime importance."

"According to the Michigan Water Resources Commission, the water in bordering Lake Superior 'has 50 parts hardness which places it in the category of rain or distilled water.' Lake Michigan water is of high quality too."

On the availability of land, the report comments:

"Ample land suitable for industrial sites is available in practically all sections of the peninsula. Several cities have excellently zoned industrial districts and others are planning them."

"Coal and fuel oil are delivered to all port cities by bulk carriers and tankers. A large oil pipeline from the Canadian Alberta field to Sarnia, Ont., refineries runs the entire length of the peninsula."

Briefly Told
Highway Load Limits—Effective at 12 noon March 20 weight restriction enforcement will be modified to allow normal loadings on concrete based state trunk lines south of and including a line from Mount Clemens to Muskegon via M-59, Mount Clemens to Howell and US-16 to Muskegon, except restrictions on loadings which will be continued on M-21 between Grand Rapids and Holland.

Correction—Irving Nelson of Kingsford, who won the highest honors in Michigan High School debating in 1949, was under the charge of John Romstad, presently debate coach at Escanaba High School, and not, as stated in yesterday's publication, under the coaching of Marvin Fredericksen, debate coach at Manistique high school.

REPORT CARDS SOUGHT
GRAND HAVEN, Mich. (AP)—A group of Grand Haven parents has petitioned the school board to return to the report card system for pupils in elementary grades. Report cards were abandoned in favor of a parent-teacher conference system. The petitioners said they wanted to see how Junior was doing—on paper.

WHO'S KIDDING WHO? AND WHY?
Immediately after the publication of the Pfeifer-Shultz report for which the Escanaba City Council paid \$2450.00 the private power offer for our Electrical Utility was increased from \$1,000,000 to \$1,200,000.

Why is the Upper Peninsula Power Company so anxious to pay \$1,200,000 for our Electrical Utility?

Answer... For every dollar they spend to buy our Electrical Utility the Power Company will take 14 cents out of Escanaba every year for Federal Income Taxes and Dividends to their Stockholders. \$1,200,000 times 14 cents on every dollar is \$168,000.00 of our own money that the Private Power Monopoly will happily pull out of Escanaba every year on the purchase offer they have made for our Electrical Utility.

WHY SHOULD WE GIVE AWAY \$168,000.00 EVERY YEAR WHEN WE CAN KEEP IT RIGHT HERE IN ESCANABA?

County Installs Addressograph

The Townships and Delta County have jointly purchased and installed an addressograph system for the writing of assessment, tax and delinquent tax rolls.

The assessment rolls for 1955 have been written and delivered to the township supervisors under the new system. The cost of the equipment and the embossing of the plates is to be covered on a pro-rated basis between the 14 townships, based on the number of descriptions levied in each township, and a budget allowance of \$2500 from the county general fund voted by the Delta County Board of Supervisors.

The distinct advantage of the new system is mainly the lack of error which has crept into the descriptions over the years by the hand writing and copying of descriptions from one year's roll to the next.

The original editing and embossing of the plates, was carried out by the Addressograph Sales Agency, in Green Bay, and they are now in the process of charting the descriptions of the various townships into books, in order that the descriptions may be further checked for errors, and corrected.

The equipment has been installed in the register of deeds office, under the supervision of William E. Butler, county clerk and register of deeds.

During the time between the writing of the assessment rolls and the writing of the tax rolls next fall, the supervisors will continue proofing the rolls and reporting corrections to be made, and this work, along with the making of new plates for changes in property ownership will be done by the personnel in the register of deeds office.

There are approximately 22,000 descriptions in Delta County, exclusive of the cities of Escanaba and Gladstone, which have addressograph equipment and write their own rolls.

Piece Of Irish Turf Sold For \$1,000 At Party In Chicago
CHICAGO (AP)—A patch of turf from Ireland—26 pounds—sold for \$1,000 at auction Thursday night.

The Irish turf, flown to Chicago for the Irish Fellowship Club to use in its annual St. Patrick's Day program, was bought by Joel Goldblatt, president of Goldblatt Brothers, Inc., department store owners.

The \$1,000 will go to Samuel Cardinal Stritch, Roman Catholic archbishop of Chicago, for his favorite charity. The cardinal and Vice President Nixon stood on a tray containing the turf as they addressed the club.

Formosa Planes Attack Red Junks; 2 Big Ones Sunk
TAIPEI, Formosa (AP)—Nationalist Chinese warplanes destroyed two big armed motorized junks and heavily damaged six off the southeast coast of Red China today, the Defense Ministry said.

The announcement said patrol planes sighted eight junks of between 100 and 150 tons in the Bay south of Tungshan Island and immediately attacked. All planes returned, the ministry said.

Tungshan is a fairly large Red island close to the mainland about 75 miles south of Quemoy.

More people get more news from newspapers than from all other sources combined.

Airport Funds Still Possible For Escanaba; Maitland Denies Deal

Renewed hope that Michigan may get Federal funds for airport improvement at Escanaba and Iron Mountain was reported today by Brig. General Lester J. Maitland, State Aeronautics director.

"I have talked to the Civil Aeronautics Authority in Washington by phone again," Maitland said, "and received strong encouragement that funds which are recaptured at the end of the fiscal year from unused allotments of other states may be diverted to Michigan."

"This means that we may be able to get some money for the two Upper Peninsula projects after July 1."

At the same time Maitland declared that Congressmen Bennett and Knox were in error when they accused the State Aeronautics Department of establishing the priorities on which the U. P. projects were denied Federal funds.

Decision By C. A. A.
"The decision," he said, "was definitely made by the Civil Aeronautics Authority in Washington, on the basis of their own evaluations. It was entirely their decision that Benton Harbor, Muskegon and Pontiac should get the available federal money and Escanaba and Iron Mountain would get nothing."

Maitland supported his claim with a copy of a letter written to him on Feb. 8 by F. B. Lee, administrator of the CAA. The letter said:

"There are not sufficient state apportionment funds available to permit programming the projects in the amounts you have recommended and the projects are not of sufficiently high priority to receive any of the extremely limited discretionary funds that are available."

"Our evaluation of the projects for which you have recommended an increase places them in the following priority order: (1) Muskegon (2) Benton Harbor (3) Pontiac (4) Escanaba and (5) Iron Mountain."

"Using our programming methods we would program the available \$99,901 as follows: Muskegon \$44,000; Benton Harbor \$50,000; Pontiac \$5,901; Escanaba 0; Iron Mountain 0."

Maitland said the state had asked \$44,000 for Muskegon, \$50,000 for Benton Harbor, and \$30,000 each for Pontiac, Escanaba and Iron Mountain.

Denies Making "Deal"
He added:

"Congressmen Knox and Bennett are definitely in error when they accuse us of making a 'deal' to this effect. We made no deal. The CAA told us what money we could have, and the State Aeronautics Commission voted to accept their decision—because if we continued to argue about it, all the federal money might have been tied up for the coming construction season or diverted somewhere else. The commission is a bi-partisan body, and there was nothing political about their enforced acceptance of the CAA's decision."

Maitland said he has written to Murle W. Hemphill, deputy director, Airports Division, CAA, Washington, confirming his telephone request for further federal funds after July 1.

His letter said in part:

"It was good to talk to you yesterday and especially good to learn that Michigan will receive some recaptured funds July 1, 1955. While I appreciate it is too early to know the amount of money that will be returned from states that did not use their allocations, Governor Williams and the Michigan Department of Aeronautics sincerely hope that Michigan will receive sufficient funds to complete the vitally important and eligible projects at Iron Mountain, Escanaba and Pontiac."

REPORT CARDS SOUGHT
GRAND HAVEN, Mich. (AP)—A group of Grand Haven parents has petitioned the school board to return to the report card system for pupils in elementary grades. Report cards were abandoned in favor of a parent-teacher conference system. The petitioners said they wanted to see how Junior was doing—on paper.

Evangelist Greeted By 300 Singers On Return To England
PLYMOUTH, England (AP)—Three hundred hymn singers greeted American evangelist Billy Graham on his arrival here today for a religious crusade in Scotland.

Long before dawn, the crowd gathered on the pier and serenaded Graham with his own theme song "This Is My Story, This Is My Song." He came from America on the liner Liberté.

For the evangelist it was a return visit to Britain. A year ago his revivals in London attracted well over a million people.

WHO'S KIDDING WHO? AND WHY?
Immediately after the publication of the Pfeifer-Shultz report for which the Escanaba City Council paid \$2450.00 the private power offer for our Electrical Utility was increased from \$1,000,000 to \$1,200,000.

Why is the Upper Peninsula Power Company so anxious to pay \$1,200,000 for our Electrical Utility?

Answer... For every dollar they spend to buy our Electrical Utility the Power Company will take 14 cents out of Escanaba every year for Federal Income Taxes and Dividends to their Stockholders. \$1,200,000 times 14 cents on every dollar is \$168,000.00 of our own money that the Private Power Monopoly will happily pull out of Escanaba every year on the purchase offer they have made for our Electrical Utility.

WHY SHOULD WE GIVE AWAY \$168,000.00 EVERY YEAR WHEN WE CAN KEEP IT RIGHT HERE IN ESCANABA?

Formosa Planes Attack Red Junks; 2 Big Ones Sunk
TAIPEI, Formosa (AP)—Nationalist Chinese warplanes destroyed two big armed motorized junks and heavily damaged six off the southeast coast of Red China today, the Defense Ministry said.

The announcement said patrol planes sighted eight junks of between 100 and 150 tons in the Bay south of Tungshan Island and immediately attacked. All planes returned, the ministry said.

Tungshan is a fairly large Red island close to the mainland about 75 miles south of Quemoy.

The City of Escanaba, Michigan Submits Its 16th Annual Report

For the Year Ending June 30, 1954

Highlights of the Year

1. Pavement widening at Ludington Street and 23rd Street intersection.
2. Mercury vapor lights installed on Ludington Street from Stephenson Avenue to 20th Street.
3. Marking of scenic route from M-35 Highway to Lake Shore Drive.
4. Wig-wag signals placed at Stephenson Avenue railroad crossing.
5. Advisory vote on fluoridation. Council authorized ordering of equipment.
6. First full year of parking meter operation.
7. Administrative Assistant and Safety Director positions abolished by Council.
8. Postcards used in utility billing for first time.
9. Two large fires — Green Mill and Northern Motor Rebuilders. Northern Motor Rebuilders building reconstructed by city.
10. Final plans drafted for new band shell in Ludington Park and sand filling begun at proposed location.
11. Additional benches and picnic facilities installed on Municipal Dock and Ludington Park, and benches provided for shoppers on Ludington Street.
12. 4,340 feet of streets paved, 1000 feet of Danforth Road improved, and 9,321 square yards of paved surface installed for car traffic and parking at the Ludington Park beach area.
13. 2,700 feet of new storm sewer construction to enclose old Butcher's Creek and permit the development of adjacent properties.

A Message From the Mayor

The Citizens of Escanaba
Escanaba,
Michigan

Dear Citizen:

The annual report for the fiscal year ended June 30, 1954 is herein respectfully submitted. The charter of this city requires that a financial report be submitted each year. We have supplemented this report with graphs, pictures, and brief explanations of the sources of revenues and the objectives for which they were expended.

This year's report, our first to be printed on newspaper special section, was so designed as to reach a maximum number of citizens at as low a cost as possible. A well informed public is the chief asset of a community, and I feel sure that this report will contribute much toward this end.

Respectfully submitted,

Harlan J. Yelland
Harlan J. Yelland, Mayor
City of Escanaba

Pictured above are the elective and some of the appointive municipal officers, who are responsible for the provision of municipal and utility services. The legislative body, elected by the people, and seated at the council table, are, left to right, Councilman Jacob A. Bink, Councilman Robert E. LeMire, Mayor Harlan J. Yelland, Mayor pro tem Edward J. Cox, and Councilman Wesley W. Hansen. Standing in back of the council are City Attorney Denis McGinn, City Clerk George M. Harvey, City Manager A. V. Aronson, and Assistant City Attorney J. R. Fitzharris.

To carry out the wishes of the people as expressed by the City Council is the job of your city manager. As chief appointive officer, the Charter of this city provides that the manager shall be responsible for the proper administration of the affairs of the city. To a large extent, this means administering such policies as the Council may establish by ordinance and resolution. The

size of this job can best be appreciated by reference to the graph on page two.

To aid him in fulfilling this responsibility, the several department heads and other officers listed, with the exception of the city assessor and city clerk, are in turn responsible to the manager for the proper administration of certain phases of municipal functions. Each is specialized in the field of work over which he is in charge.

An important contribution to the operation of your municipality is made by the members of the several boards and commissions listed. Their members, which are unpaid, with the exception of the Board of Review, devote many hours to the study of the various problems in arriving at their decisions and recommendations. The City has undoubtedly benefitted to a very great extent as a result and owes much to these public spirited citizens.

- (3) Appointed April 5, 1954
- (4) Retired March 15, 1954
- (5) Resigned April 9, 1954

Public Utilities

The people of Escanaba own and operate four utilities—Electric, Gas, Steam, Water and Sewage. In this way the municipality provides essential public services.

Except for the electric department the utilities do little more than pay their own way. One of them, the steam utility, has a history of comparatively minor operating losses.

ELECTRIC UTILITY—

Escanaba has owned and operated its electric distribution system for nearly 50 years. The city buys power wholesale from the Upper Michigan Power & Light Company. Last fiscal year the net amount turned over to the city general fund from the electric utility totaled \$240,952.63.

Escanaba's "electric problem" is the result of a private power shortage in the area. Mead Corporation purchased the Upper Michigan Power & Light Company and wants to break the wholesale power contract with Escanaba. The present contract, favorable to the people of Escanaba, does not expire until Aug. 1, 1959.

One of the "solutions" to the "power problem" is the proposal of the Upper Peninsula Power Company of Houghton to buy the city's electric distribution system. The citizens of Escanaba will vote April 4, 1955, to accept or reject the proposal.

Two other proposed solutions are: 1—To contract with Alger-Delta Electric Cooperative, Gladstone, for a 10-year supply of "surplus" power; and 2—To construct a municipal electric generating plant, which would be paid for from electric utility revenues.

During the past fiscal year the city purchased and distributed 3.6 per cent more electric energy than in the preceding fiscal year. The city spent \$6,413.53 more for electric distribution, represented in costs to benefit the customer including: Checking on radio and TV interference, repairing fuse trouble, repairs to house service, and lengthening hours of off-peak electric use for water heating.

Capital improvement in the electric department included installation of mercury vapor street lights on Ludington St. from Stephenson to 20th; placing wiring underground at the Ludington Park beachhouse; installation of 14 street lights in outlying areas; installation of a new traffic signal at 10th and Ludington.

STEAM UTILITY— Central steam heating in Escanaba had a brighter outlook at the close of the 1953-54 fiscal year, although the steam utility suffered a net loss of \$13,135 in operation.

The steam plant, which has been operating at only 30 per cent of its average capacity, has by the addition of new customers increased its revenues without unpling its fixed charges. Northern Motors Rebuilders and the Birger Johnson building were added in the past fiscal year, and the Chicago & North Western Railway was slated to soon become a customer as the year ended.

On the credit side of the utility: Elimination of smoke and soot from individual heating plants in the downtown area, thus creating a cleaner and more healthful community.

GAS UTILITY— Revenue went up only slightly but costs were greatly reduced in the gas utility as several problems were solved in the switch-over of the distribution system to propane gas.

Gas users, of course, were most interested in the reduction in rates to all residential and commercial customers, which became effective July 1, 1954. A further decrease in gas customer's bills can be expected as a result of a reduction in the cost of propane from the supplier.

The gas utility's production and distribution costs in the past fiscal year were reduced \$26,320.33 below the previous year by the work of personnel in all phases of operation and service. These accomplishments establish the gas utility as a potential money-maker.

WATER UTILITY— Clear, clean and palatable water from Escanaba's new water plant is the result of the improved pumping and filtration facility and the control of the plant by trained and alert operators. During the year the water plant operators met once each week in study sessions incidental to operation of the new plant.

Extension of the water distribution system has kept pace with the demand. Five water hydrants were replaced, seven were placed in existing mains, and four went in with new mains. There is a total of about 380 hydrants in the system.

Fluoridation of the water as a method of reducing tooth decay among children was approved by the citizens in an advisory vote in the spring of 1954. The Council thereupon authorized ordering fluoridation equipment.

Escanaba's sewage disposal plant was built in 1931 and continued to give good service during the past fiscal year. By-product of the plant is the gas from digesters which is used to operate a gas-driven electric generator producing at the rate of about 25 K.W. an hour.

SERVICE DEPARTMENT— This department sets and removes electric, gas and water meters, maintains the parking meters, and adjusts all gas appliances such as stoves, water heaters, space heaters, clothes driers, furnaces and mangles.

Emergency service is provided by the department on a 12-hour basis each day Monday through Friday from 8 a. m. to 9 p. m.; and on Saturdays from 8 a. m. to 5 p. m.

Public Works

The story of a growing Escanaba might be told in lineal feet, except the services of the Public Works and Engineering Department are of such scope and variety they must be more fully described to be appreciated by Escanaba citizens.

Sewers were installed, curbs and gutters built, streets were improved with paving and water mains were extended in thousands of lineal feet during the past fiscal year. In addition, many other functions were performed by the 40 regular and 30 to 40 seasonal employees of the Department.

Behind the statistics is an interesting story of Escanaba's growth, of the need for improved drainage so that valuable building sites could be utilized, and the extension of streets and sewers to meet the needs of expanding development.

New storm sewer construction during the past fiscal year totaled 2,700 lineal feet from the intersection of S. 18th St. and 7th Ave. S. to the intersection of S. 22nd St. and 3rd Ave. S. This was part of a continuing public works project to enclose old Butcher's Creek and allow the development of adjacent properties, notably the new Holy Name High School.

A growing city, with new homes going up in many locations, requires extension of sanitary sewers and water mains. During the past year 860 lineal feet of sanitary sewers was laid and 3,638 lineal feet of water main was installed.

The city of Escanaba has a continuing long-range street program, and in the past fiscal year 4,340 lineal feet of street was given a paved surface. Besides this, 9,656 lineal feet of curbing and 17,500 square yards of gravel base were installed in preparation for paving next year. An important part of the program was the improvement of 1,000 feet on Danforth Road.

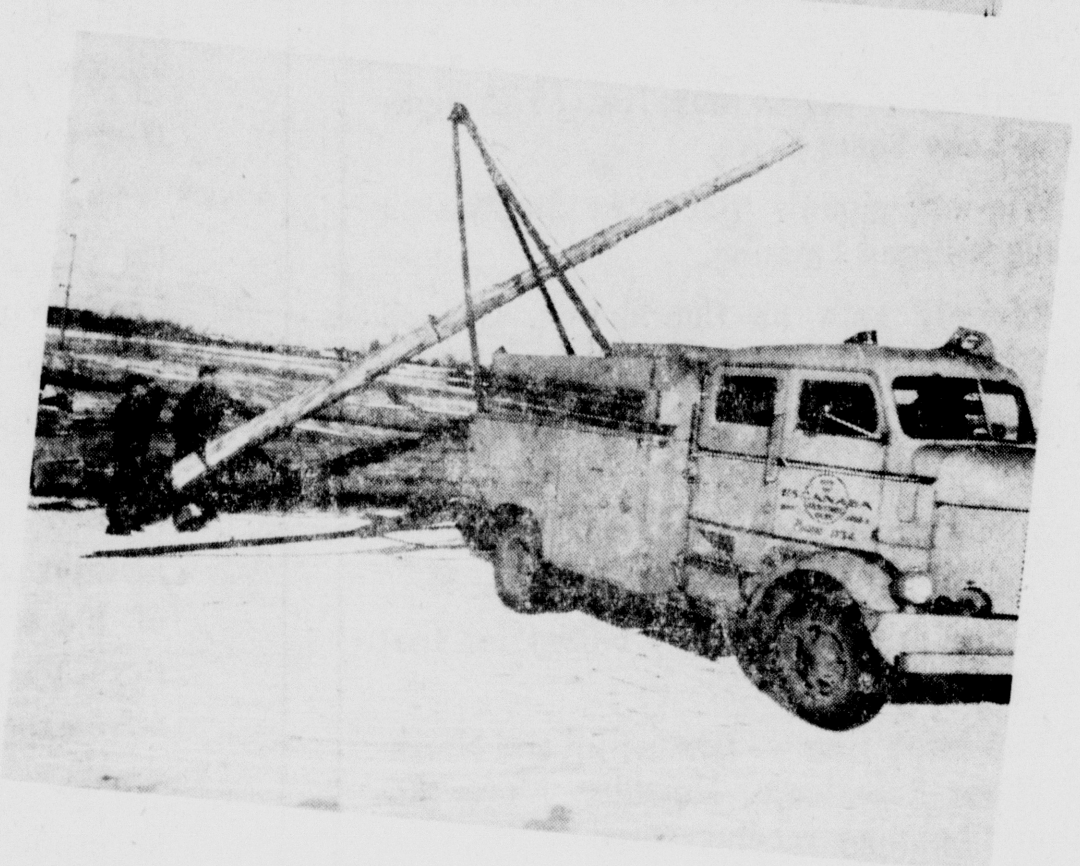

Besides the street paving 9,321 square yards of paving was constructed in Ludington Park in the bath house area.

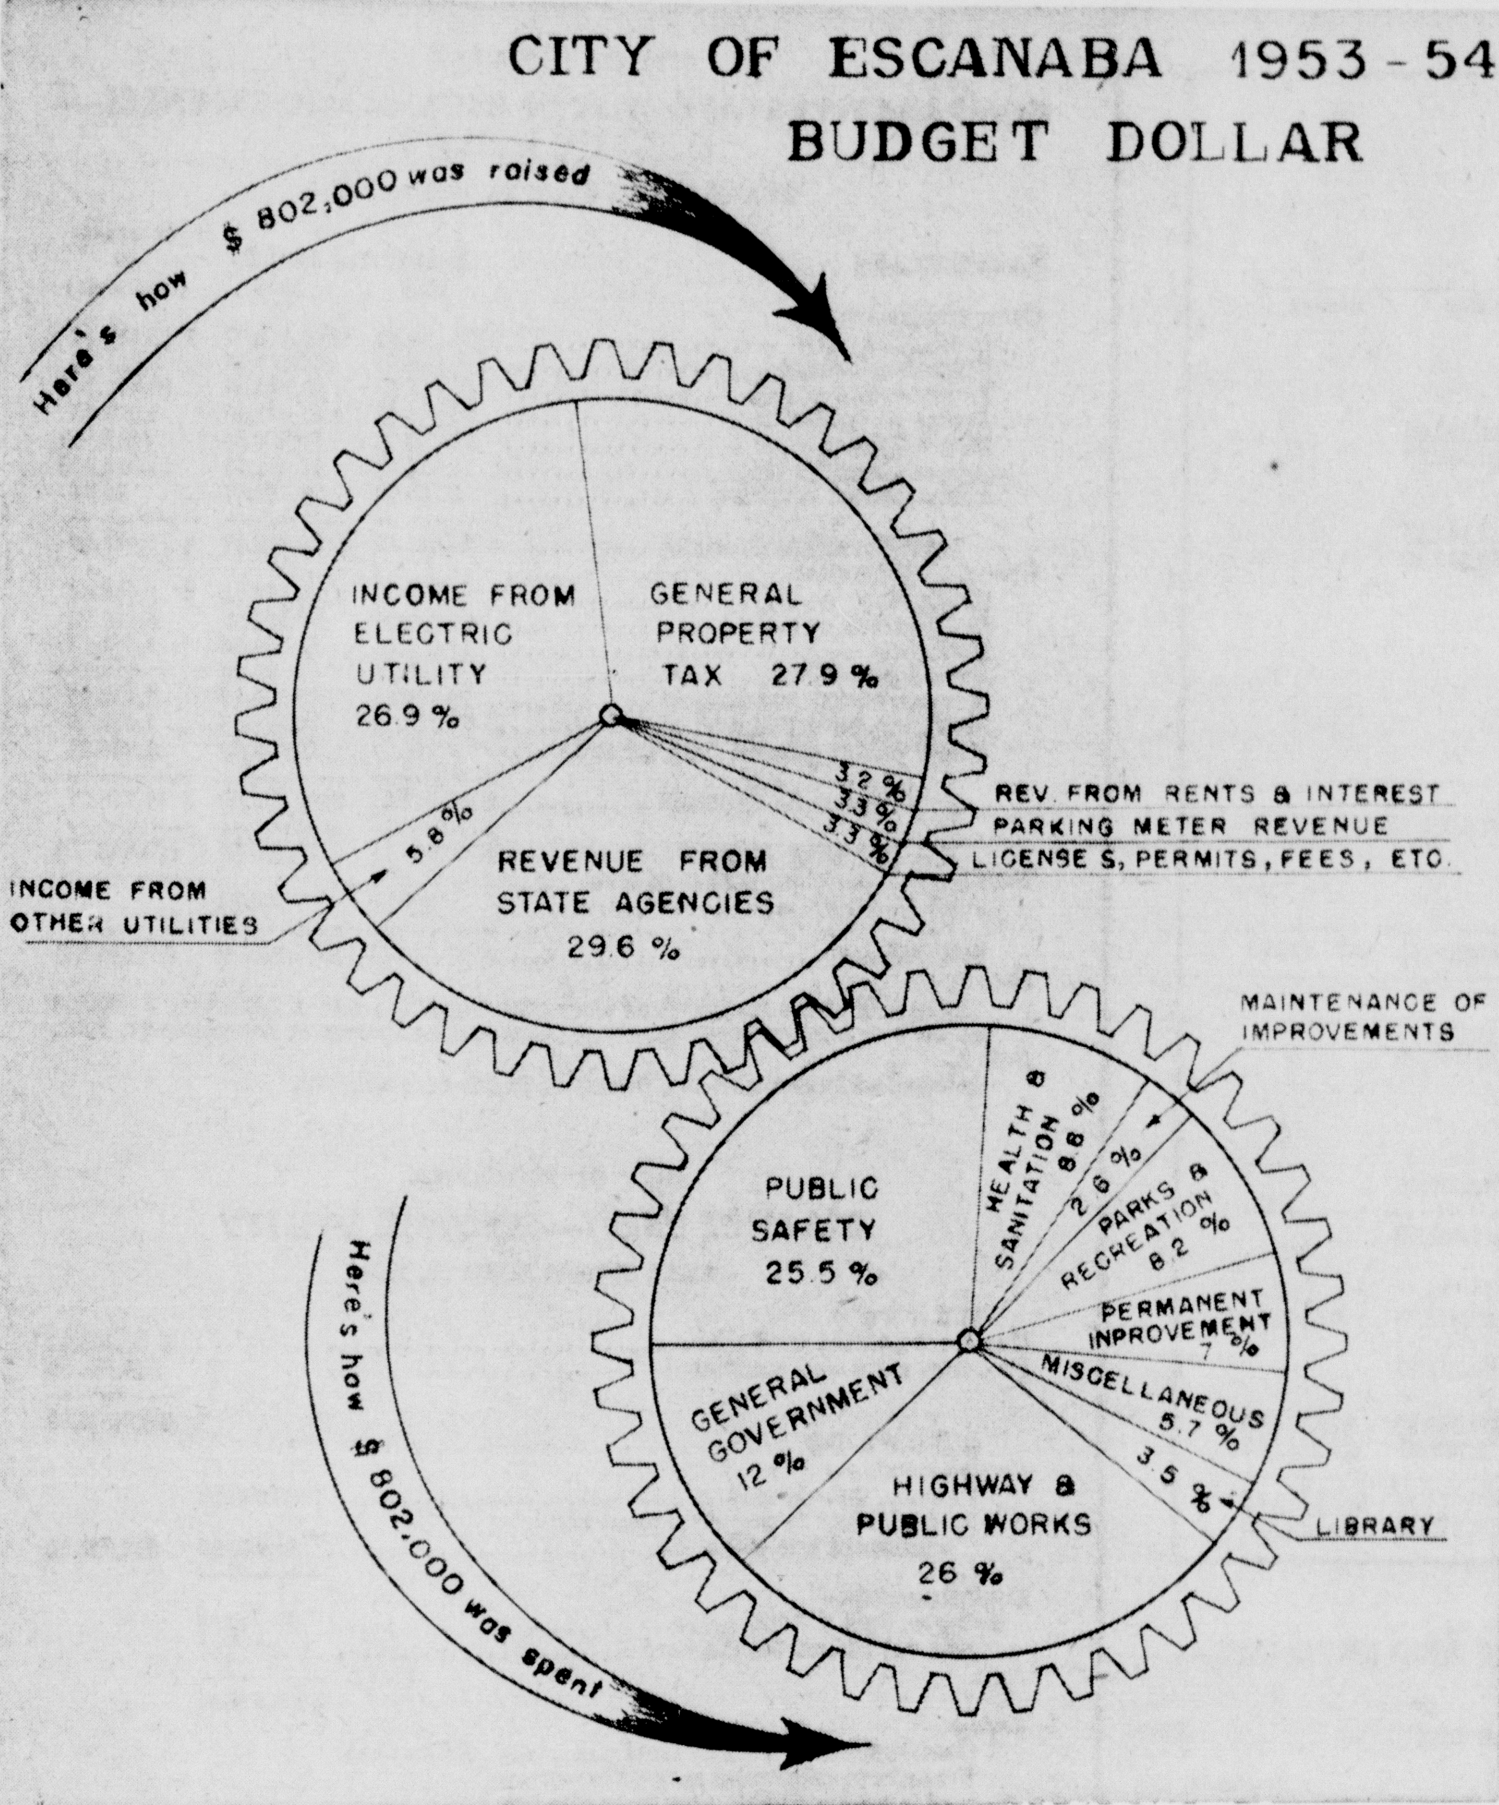

Construction is only a portion of the responsibility of the Public Works Department. Street maintenance is, in fact, the largest single operation of the Department, and includes patching street surfaces, removing snow, sweeping streets to keep them clean, picking up the leaves that can choke gutters in the fall, and keeping the storm drainage system cleared.

Other functions of the Department range from maintenance of city buildings, collecting garbage, operation and maintenance of the airport, water front development, operating a labor and equipment pool for all other departments, to maintaining the sanitary and storm sewer systems.

During the year an instruction course was given to all department heads and foremen who were interested in "Public Works Administration." This was designed as a course to better acquaint all departments with the operations of the Public Works Department.

Police and fire protection cost a lot of money, considering the city's total budget, but it is money well spent. When a house is on fire or lawlessness threatens, the citizen needs help—quick.

The above graph shows how your city government was financed last year. Revenues shown for the utilities are the net profits after the deduction of all operating expenses. When the total utility revenues and expenditures are summarized with the general city budget it reaches one and one-half million dollars, — a tremendous responsibility for your city government.

Public Safety

The Police Department, headed by Chief John P. Finn, former captain appointed chief on June 7, 1954, performs a variety of duties with its 20 members.

Highlights of the Police Department for the fiscal year are based in a policy of increased activity and training toward more effective law enforcement. All new recruits receive police institute training in Lansing; traffic patrols were stepped up; special attention was given traffic safety measures.

Among measures designed to provide greater traffic safety to school children is the school safety patrol retraining by police officers. New stop lights were placed in operation in four locations and automatic wig-wag signals were installed at the C&NW Railway crossing on Stephenson Ave. Traffic patrols were stepped up in the "first line of defense against crime."

Traffic patrols are maintained around-the-clock and last year the total patrol mileage was 129,922—a distance of more than five times around the world! Thorough and extensive patrolling brought an increase in the number of arrests for traffic violations and kept the traffic accident rate down to a minimum.

The Police Department received a total of 4,328 complaints during the fiscal year. Total actual offenses against law and order in Escanaba increased from 1,206 to 1,850, of which 37 per cent were cleared by arrest. The Department arrested 127 juveniles and 251 adults.

Fire protection as practiced by the Escanaba Fire Department has two phases: 1—To prevent fires by inspecting for fire hazards and educating citizens to be careful not to start fires; and 2—To extinguish fires once they have started.

Heading the Fire Department in its program of fire protection is Chief Nels Bergeon, a veteran in the organization who was appointed chief last year. Another highlight of the year in the Fire Department was the arrival of a new 1,000-gallon pumper truck, the first new piece of large equipment in the department in several years.

During the past year the Fire Department responded to 350 alarms—a drop of 104 from the previous year. The decline was in the number of grass and brush fires and in false alarms.

Despite fewer calls, the total fire loss in Escanaba for the fiscal year was the greatest it has been in many years—\$338,310.76. The loss was for the most part due to two costly industrial fires: The Green Mill and the Northern Motor Rebuilders plant. Both fires had gained considerable headway before they were discovered and reported to the Fire Department. Neither building was equipped with a fire detection or sprinkler system. Loss of contents in both buildings was high.

A broader controlled grass burning program by the department was held responsible for reducing the number of grass and brush fires during the year. The department discontinued issuing grass burning permits.

Parks and Recreation

Although they are separately administered, recreation and parks go together in Escanaba. Most of the summertime recreation program centers in the parks and at the swimming beach.

Development of facilities at Ludington Park continues year by year. In the past fiscal year additional tables and benches and drinking fountains were installed. The Parks and Forestry Department maintained all park and yacht harbor facilities, provided sanitation services, and tended to some 40 acres of lawn and landscaped areas.

Planting of trees and shrubs in public parks and along the streets and the care of trees and shrubs in public areas aid in keeping Escanaba beautiful.

Escanaba's program of recreation is successful because of the assistance of many volunteers and the advice of the Recreation Board. The Recreation Department assists local organizations with volunteer programs.

The summertime program reaches several hundred young people through organized activities—swimming instruction, junior baseball, arts and crafts, tennis, croquet, shuffleboard, softball, basketball, horseshoes and many other special events.

Wintertime programs include skating at a number of outdoor rinks, plus the annual Ice Show at the indoor rink and many activities for young people at the Youth Center. Spring has kite flying and fall its football events—a recreation program around the clock and for all seasons and all ages.

Carnegie Public Library

Fifty years of community service was celebrated by the Library on Sept. 21, 1953, marking a growth from an original 1,200 to the present 28,000 books on the shelves. Circulation last year was 82,811 and the total number of employees was five, compared to two employees in 1903.

During the fiscal year a phonograph record lending library was started, with more than 60 long-play records of classical music, operas and songs on file. Minor changes were made in the Library building, improving the entrance doorway and providing more book storage space.

Self-help "how-to-do-it" books continued to be most popular among non-fiction Owners of television receivers were no exception. Books on TV servicing came in for their share of circulation.

Metered Sales	\$134,630.34	\$137,526.71	\$ 2,896.37
Flat-rate sales	1,456.11	1,248.86	(207.25)
Hydrant rental	13,440.00	14,440.00	1,000.00
Inter-departmental sales	2,466.91	2,300.57	(166.34)
Miscellaneous	3,865.91	2,530.41	(1,335.50)
Total Operating Income	\$155,859.27	\$158,046.55	\$ 2,187.28
Operating Expenses:			
Production	28,155.26	33,170.57	5,015.31
Transmission and distribution	18,696.24	20,292.05	1,595.81
Collection	9,824.14	10,619.80	795.66
Sales Promotion	18.00	20.00	2.00
Administration and general	12,724.17	14,210.95	1,486.78
Provision for retirement of facilities	15,615.92	31,346.23	15,730.31
Taxes paid to general fund (Note 1)	7,888.35	18,274.18	10,385.83
Total operating expenses	\$ 92,922.08	\$127,933.78	\$ 35,011.70
Net Operating Income	62,937.19	30,112.77	(32,824.42)
Other charges:			
Interest on water revenue bonds	23,850.00	23,700.00	(150.00)
Provision for reserves to restricted funds:			
Replacement fund	5,000.00	5,000.00	
Reserve fund	25,000.00		(25,000.00)
Total other charges	53,850.00	28,700.00	(25,150.00)
Net income	\$ 9,087.19	\$ 1,412.77	\$ (7,674.42)

Note 1. Taxes paid to the general fund was computed at the rate of \$37.59 per \$1,000.00 on 35% of the book value of property, plant and equipment at December 31, 1952.

Note 2. The increase in the provision for retirement of facilities and in taxes paid to the general fund is due to the new water plant.

Note 3. The above statement does not include any charge of interest on investment as the funds provided for the new water plant are revenue bonds.

Wells Camp Fire Girls Complete Birthday Exhibit

Girls of the Netopew group of Camp Fire Girls of Wells under the guardianship of Mrs. Lawrence Klug and Mrs. Luther Krantz, have completed an exhibit to exemplify the national birthday project, "Let Freedom Ring". The exhibit is on display at the Wells school.

The birthday project is a study of the Bill of Rights and of the founders of this country. The group exhibit includes posters to represent each of the "freedoms" expressed in the first ten amendments to the Constitution of the United States and silhouettes of some of the important "Bell Ringers for Freedom", such as George Washington, Thomas Jefferson, Benjamin Franklin, Paul Revere and Patrick Henry.

The girls also have written a play about the ratification of the Bill of Rights which is an interesting commentary on the way of life in 1791, referring to dress, food, leisure activities, and predominant topics of conversation, as well as a factual account of this historically significant event. The setting of the play, written entirely by the girls is a typical early American quilting bee.

The members of the group are Mary Cook, Sandra Gustafson, Lorna King, Suzanne Klug, Barbara Kozar, Carol Lee, Darlene Williams and Bette Wilson. The group is under the sponsorship of Mrs. Earl Williams.

Three one-half cup servings of cottage cheese give the same amount of calcium as a cup of milk. So when youngsters aren't drinking their full quota of milk, it is wise to serve them cottage cheese. Small fry often welcome the cheese along with such cooked vegetables as beets or carrots; or they will enjoy it served with a ring of pineapple, raisins, or some drained stewed apricots.

weighed 8 pounds and 6 ounces at birth. Mrs. Wils was Cleo Langford before her marriage.

Patrick Pear is the name chosen by Mr. and Mrs. Gunnar A. Pearson, A Street, Wells, for their son, born St. Patrick's Day, March 17, at St. Francis Hospital. Mrs. Pearson is the former Kathleen Mullin.

Mr. and Mrs. Roland J. Taylor, 1530 Sheridan Road, are the parents of a son born at St. Francis Hospital March 16. The baby weighed 8 pounds and 10 ounces. The mother is the former Ann Waterspank.

Mr. and Mrs. Joseph A. Drossart, 812 Minnesota Ave., Gladstone, are the parents of a daughter born at St. Francis Hospital today, March 18. The baby weighed 6 pounds and 12 ounces. Mrs. Drossart is the former Joan Elliott.

Career Now Is Making Money For Her Church

CAPE PORPOISE, Maine.—When they talk about "The Tibbetts Project" in this little seacoast town they mean Miss Arlettie Tibbetts. At the age of 71, the retired Boston bank clerk says she wishes some days had more hours. Her aim in life is to earn money for her church.

How She Does It Since she returned to her girlhood home and launched her project she has never brought in less than \$500 a year. In 1953 she earned \$1,000.

Here are some of the things that kept little Lettie busy.

She raised 75 African violets. She crocheted dresses for 80 dolls, and sold 77 of the dolls. She sold 400 aprons made by some of the other 100 members of the Cape Porpoise Methodist Church. She made 150 of the aprons herself. She sold greeting cards, stationery, furniture and household items brought to her from others.

One room in her modest, old house is called The Church Room. Here she displays many items bought by residents and summer visitors. Her garage is cluttered with furniture—also for sale. In the big year of 1953 she sold two pianos, two organs, an electric stove and a washing machine.

Where It Goes Except for a bit of working capital, every penny she earns goes to the church. Lettie also decides how the money will be spent. This she says is part of the fun. She allocates \$25 monthly toward the pastor's salary. Of the \$1,000 she earned, she earmarked \$300 toward the minister's salary, \$500 toward the parsonage for an electric stove, breakfast set, and wall-papering. The rest was spent for incidentals.

Miss Tibbetts launched the Tibbetts project within a month after she retired from the Merchant's National Bank in Boston following 31 years service. That's when she learned the church had a deficit.

It's easy to oven-barbecue a chicken. Just quarter the broiler or fryer and arrange it in a baking pan. Mix up your favorite barbecue sauce and drizzle some of it over the chicken. Bake in a moderate oven, adding more barbecue sauce at regular intervals, until chicken is brown and tender.

St. Patrick's Day Entertainment Is Successful Affair

A sparkling entertainment of Irish songs, dances and playlets was presented to a capacity audience last night at St. Patrick's parish hall by children of St. Patrick's School under the direction of the Sisters of the school. The traditional St. Patrick's Day program was sponsored by St. Patrick's Home and School Association.

Special features in addition to the numbers presented by the school children were the music of Chet Marrier and his orchestra, with Beverly Frappier, soloist and square dancing by members of the Home and School Association with Steve Baltic of the Do-Si-Do Club, caller.

Welcomed Audience Joseph Heirman, president of the Home and School Association, welcomed the audience, and introduced Vince Casey of WDBC who was a clever and entertaining master of ceremonies.

Children of the first grade presented Songs of the Gay Nineties, with Donald Curran as the announcer. "McNamara's Band" and the Kerry dance were given by the second graders with a solo, "I'll Take You Home Again, Kathleen," by William Prinsick. The third grade number included a playlet, "Wearing of the Green" and "Now Belinda," and the fourth grade presented an old time minstrel with Gary Severinsen, the interlocutor and "Balling the Jack," Bridget Gallagher gave the excellent pantomime of "Mammy."

A medley of Irish songs was the fifth grade number, "Lesson In Modern Times," and featuring Marion Finley was given by the Sixth grade. Seventh grade girls gave a baton drill and the boys presented "Fatal Quest," a short comedy.

Green and White At the close of the performance Mrs. V. J. Lang was presented with a bouquet of flowers in appreciation of her assistance in staging the program.

The hall was decorated in a St. Patrick's Day theme of green and white for the entertainment.

Personals

Robert Wight of Hinsdale, Ill., who came here to attend the services of Mrs. Parker Crose, is a guest at the home of Mr. and Mrs. William F. Kammeier, 207 N. 16th St.

Joseph Larmay Jr. and Theodore Dewar returned to their home in Alhambra Calif., after attending the funeral of Myrtle Grace Curry.

OVER THE THRESHOLD

A popular custom is that of the groom carrying his new wife over the threshold of their new home. This should be done the first night the couple spend under their own roof.

Meringue recipes sometimes call for a little lemon juice because the juice not only gives flavor to the meringue when it is used as a pie topping, but it helps the cutting quality. Add the lemon juice to the egg whites just before beating.

NO-SCRUB WAY TO GLEAMING FLOORS

Everybody has heard of the housewife who kept her kitchen floor so clean you could eat off it.

We never met her. But we know how she did it. She did it the hard way—on her hands and knees—with a scrubbrush. Today, you can keep your linoleum or asphalt tile immaculate with only a fraction as much effort.

Just apply Glaxo, the wonderful floor coating. Its water-clear finish seals out dirt so well you can clean it in a flash. Glaxo eliminates waxing, and you put it on only about twice a year.

Social-Club

Bethany groups meeting Saturday morning include the 9th grade confirmation class at 8:30, Sunday School Choir at 9:30, Triolet Choir at 10 and Cherubs at 11:30.

D. A. R. Meeting Lewis Cass Chapter, Daughters of the American Revolution, will meet Monday at 2:30 p. m. at the home of Mrs. W. J. Anthony, 404 Lake Shore Drive, instead of at the home of Mrs. Bruce Brackett.

Celebrates Birthday Harold Gagnon, son of Mr. and Mrs. Walter Gagnon of Ford River, celebrated his 17th birthday yesterday, March 17, St. Patrick's Day, at the home of his parents. A birthday cake, decorated with a St. Patrick's Day theme, and other refreshments were served the guests. Harold received many cards and gifts.

Ford River Club The Ford River Home Extension Club met yesterday afternoon at the home of Mrs. F. W. Schmitt, 901 1st Ave. S. Members voted on three groups of programs for 1955-56 available from Michigan State College, and an informal discussion followed. A St. Patrick's Day theme was used for the refreshments. The next meeting will be held April 21 at the home of Mrs. G. R. Stegath and the lesson will be "Meet the Meat Bill."

Skilled Jills Meet The Skilled Jills, home extension club, met Thursday evening at the home of Mrs. John Holland Sr., 805 S. 15th St. A lesson on program planning was presented by Mrs. Clyde Moersch and a vote on future projects taken. The club also voted to send a gift to the Bay Cliff Health Camp. A period of games was followed by lunch. Decorations were in keeping with St. Patrick's Day.

Leidner - King Engagement Told

Mr. and Mrs. Carl Leidner of Arnel, N. J., announce the engagement of their daughter, Florence Eleanor, to Sgt. 1/c Maurice J. King, son of Mr. and Mrs. Fred King, 1111 6th Ave. S., Escanaba. The wedding will take place June 4 at New Jersey.

U. P. Sportmen's Unit Asks Study Be Made Of Access Question

Directors Act On Measures In Legislature

NEGAUNEE — Meeting in an executive session here, directors of the Northern Michigan Sportsmen's Association passed a resolution aimed at insuring continued access to areas where public hunting and fishing are permitted.

The resolution asked that "the Conservation Department assume the responsibility for making a survey of the legal aspects of access to public hunting and fishing areas and that the department then propose legislation to protect public access."

Nine Clubs Represented

The action was taken in an effort to safeguard passage over roads, trails, fire lanes and other avenues of access for the hunter and fisherman to state-owned lands. The resolution was regarded as another attempt by organized sportsmen to make certain that hunting and fishing rights

will be protected in the face of increasing populations.

Directors representing nine of the clubs affiliated with NMSA also took action on several resolutions concerning game and fish law proposals pending before the Legislature. A report of the measures they favored and opposed was to be forwarded to members of the Legislature this week.

Saturday Opening Backed

Among the bills endorsed was SB-1053, introduced by Sen. Philip Rahoi of Iron Mountain, calling for opening of the deer season on a Saturday. Directors suggested that the House conservation committee be contacted to amend the present

Quick Shots

Forty-six varieties of fish are native to Isle Royale, including pike, whitefish, perch and trout—lake, brook and rainbow.

Members of the Mackinac Conservation Club are in for a special treat—bison meat. George Michalka, club president, ordered six buffalo steaks from a dealer in Traverse City and plans to serve them at one of the club's future meetings.

Subject of this weekend's "Michigan Conservation" television show will be the story of what modern forestry practices mean to the average man. The show, presented by the Michigan Conservation Department, is telecast by WBAY-TV, Green Bay, and CJIC-TV, Canadian Soo.

Parent Lake Eagles Make Early Return

COVINGTON — From Conservation Officer Clovis Delene, Covington, comes word that the pair of bald eagles which have nested along Highway US-41 near Parent Lake in Baraga County have returned to the nesting site.

They were observed for the first time this year on March 8, more than a week earlier than they have been first seen any spring in the past. "Many tourists—and local people, too—have taken pictures of the eagles during the summer in the large pine tree where the nest is located," Delene said.

Arrow Halves Match, Ending Hunt Mystery

SAULT STE. MARIE — Here's a story for the archers' hot stove league.

Last fall, Harold Hill of Kalamazoo was hunting deer on Drummond Island with bow and arrow when he found a dead deer that had been shot recently. He dressed the deer out and placed it on his car. In dressing the animal, he found the broadhead half of an arrow shaft in the deer's carcass.

On his way back to camp, Hill met another archer, Harold Olsen, Jr., Muskegon, who told Hill he was returning to take up the search for a deer he had shot with an arrow earlier in the day. Hill produced the half of the arrow he had found in the deer. Olsen produced the half he had found on the ground after firing at the deer. The two halves matched perfectly. The deer was promptly loaded on Olsen's car with grateful thanks to Hill.

Excellent Facilities Offered Camp Groups At Clear Lake

ESCANABA — If you are in charge of a group looking for a camping site for one or two weeks this summer, the Clear Lake Forest Camp might be just the place for you.

Located near M-94 in Schoolcraft County, eight miles south of Shingleton in the Hiawatha National Forest, the camp is maintained by the U. S. Forest Service for use by groups of between 32 and 64 persons.

Dates Still Available

It is open each year from June 26 to Aug. 27, but some of that period already has been reserved this year. A group of Camp Fire Girls has reserved the camp from July 11 to July 29 and the Milwaukee YMCA will occupy the camp from Aug. 1 to Aug. 14. That leaves the periods of June 26-July 9 and Aug. 14-27 still available.

Floyd T. Roberts, Munising, district forest ranger, said cost to any group renting the camp is \$125 per week. That figure, he said, includes all equipment except bedding, kitchen and dining room linen, food, ice and fuel, other than wood, which is provided.

House bill so that its provisions coincide with the Senate bill. Several bills have been introduced providing for a Saturday opening of the deer season, but the NMSA directors said Rahoi's bill most nearly fulfills the desires of Upper Peninsula sportsmen.

Also endorsed was SB-1068, which would authorize the Great Lakes states to enter into a compact with Canadian officials to govern water resources affairs on the Great Lakes.

Great Lakes Fishing License

The directors also backed a proposal to require all persons sports fishing on Michigan's Great Lakes waters to purchase a general rod license. At the same time, a motion was passed to contact Upper Peninsula members of the Senate and House conservation committees to urge them to file a bill requiring the general rod license. At present, Michigan residents who fish in Great Lakes waters only are not required to purchase such a license.

A proposal to permit designation of waters for spring taking of rainbow trout in addition to those waters open for fall 'bow fishing also won endorsement from the directors, as did a measure which would prohibit sale of sea lampreys or their use as bait to curb possible introduction of this species in inland waters.

Discretionary Power Issue

A measure to authorize a number of areas of state land for experimental management of certain game species without the restrictions of the regular seasons and bag limits was endorsed with the provision that the proposal would not be "used to obtain an 'any deer' kill in the Upper Peninsula."

Trout Season, Limit

They also opposed any bills which would abolish the fox bounty, reduce the creel limit on trout or shorten the trout season. All of these proposals have been supported by the Conservation Department. Another department-sponsored measure—one which would amend parts of the legal code to make effective in the Upper Peninsula the law which prohibits possession of firearms in a car from sunset to sunrise during the closed season on small game—also was opposed by the directors.

On the question of raising additional revenue to finance state parks operations, NMSA directors voted to endorse a proposal to provide an annual car sticker for \$2 for sale to parks patrons. They opposed an alternative proposal, one which would earmark royalties from minerals on state-owned lands for parks purposes.

Unusual Plan In Education

An unusual plan, advanced by representatives of the Iron Mountain-Kingsford Sportsmen's Club, also was approved by directors. This plan calls for the State Legislature to appropriate funds to help finance training of public school teachers in conservation fields.

Directors decided that, in the case of bills filed following their meeting, endorsement or opposition would be indicated by NMSA to the legislature according to the matters covered in the bills may have been acted on at the association's last annual convention.

Organizations Listed

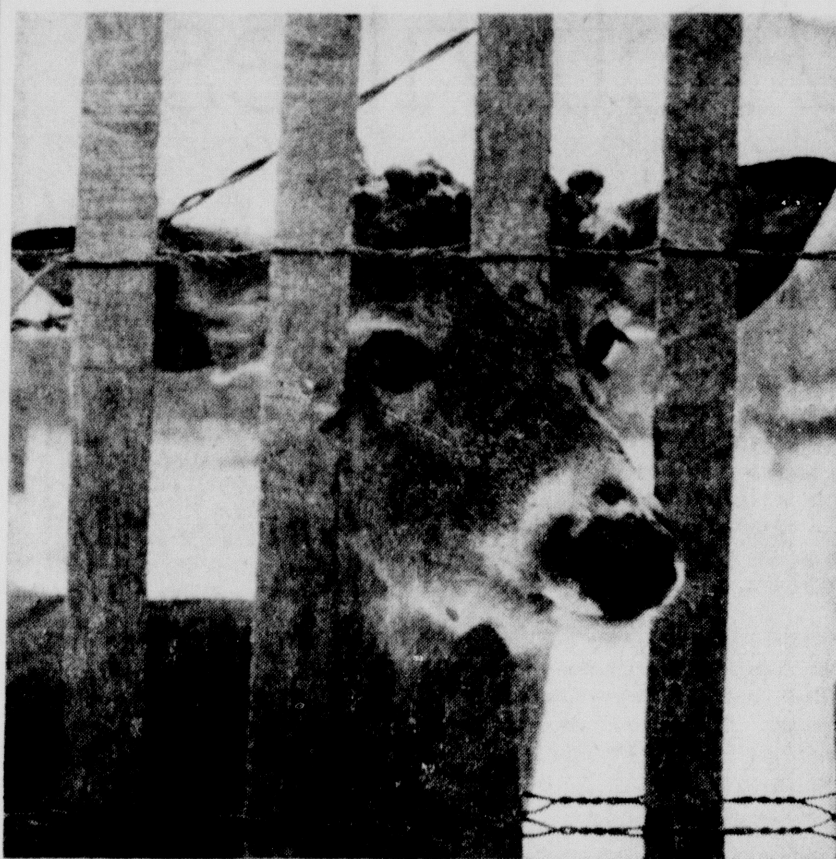

M. F. DeFant, Negaunee, president of the NMSA, presided at the meeting. Bill Nault, Ishpeming, NMSA legislative chairman, presented the bills which have been introduced in the Legislature.

Clubs represented at the meeting included the Iron Mountain-Kingsford Sportsmen's Club, Negaunee Rod & Gun Club, Ishpeming Sportsmen's Club, Norway Restoration Association, Forsyth Township Sportsmen's Club, Ishpeming Beagle Club, Marquette Rod & Gun Club, Munising-Alger Conservation Club and Schoolcraft County Sportsmen's Club.

The camp is equipped with safe, modern and sanitary facilities in a forest environment. On the site are two large central buildings for general administration, recreation, dining and kitchen facilities; eight cabins arranged in two separated groups of four cabins each; two lavatory buildings equipped with showers, toilets, basins and hot water facilities, and an infirmary.

Other camp features include bathing benches and dock on the shores of Clear Lake, two play fields, horseshoe courts, an outdoor theater, a diving float and rowboats, along with outside fireplaces, tables and cupboards. Groups interested in reservations at the Clear Lake camp should write the Forest Supervisor, U. S. Forest Service, Escanaba, Mich., stating the following information: name and address of group and of person responsible for group; whether group is composed of children or adults; number of persons in group; whether the group is sponsored by a public agency or individuals; and period during which camp is desired.

Buck Sprouts Odd 'Antlers'

Peering through a hole in the fence at the Dead Stream Swamp enclosure maintained for experimental purposes in Montmorency County by the Conservation Department is a buck white-tail with a most unusual "antler spread." The animal suffered a gland injury, which may have resulted in the growth of a cluster of horny material atop his head in place of the normal antler growth. —(Northern Peninsula Outdoors Photo.)

Four Waters In Upper Peninsula Added To Early Rainbow Roster

Four waters in three Upper Peninsula counties have been added to the list of streams and lakes open to the extended spring season for rainbow trout.

In addition, the open area in another stream has been extended for the special, early season.

Streams, Lake Listed

New waters, open to early 'bow fishing for the first time this year, are:

Baraga County—Little Carp River from mouth upstream to South Shore railroad bridge in Section 9, T51N, R33W and Kelsey Creek from mouth upstream to US-41.

Keweenaw County—Morrison Creek from falls in Section 26 downstream to mouth.

Luce County—Bass Lake in Sections 17, 18, 19 and 20, T47N, R11W.

The stream in which the open area has been extended is Tobacco River in Keweenaw County from the mouth to the road bridge in Section 20, T56N, R30W.

Season Opens April 9

The special early rainbow season will begin April 9, three weeks in advance of the general trout fishing opening on April 30.

Game, Fish Lectures Set At Five Sites

ESCANABA — A University of Michigan series of lectures on hunting and fishing in the Upper Peninsula will be presented at five—and possibly six—Northern Michigan communities, starting the week of April 11.

Charles Folio, Escanaba, director of the university's extension service in the Upper Peninsula, said the lectures will be heard in St. Ignace, under sponsorship of the Mackinac Conservation Club; Manistique, the Schoolcraft County Sportsmen's Club; Newberry, the Tahquamenon Sportsmen's Club; Munising, the Munising-Alger Conservation Club and Ishpeming, under sponsorship of several Ishpeming and Negaunee groups.

He added that arrangements were being discussed concerning the possibility of offering the series in the Iron River-Caspian area under joint sponsorship of sportsmen's clubs there.

Sponsors of the series in Ishpeming include the Ishpeming Sportsmen's Club, Ishpeming Beagle Club, Tomahawk Bowmen, Dead River Camping Association and the Negaunee Rod & Gun Club. M. A. Haney, director of adult education at the Ishpeming High School, is acting as coordinator for the series there. Registration tickets may be obtained from him.

Five Talks In Series

The series consists of five lectures by U. of M. faculty members, all of whom have performed professional work in the Northern Peninsula. They are Richard Weaver, William H. Burt, Albert S. Hazard, Warren W. Chase and Karl Lagler.

One lecture will be presented each week in each community. Dates had not been definitely decided on earlier this week, but Folio said the series is scheduled to be heard in Newberry on Saturday nights and in Ishpeming on Thursday nights.

Color slides, films and demonstrations will be presented with the lectures.

Louisiana Woodcock Bagged In Michigan

LANSING—A woodcock band report was received in Conservation Department Offices recently, a rare occurrence in wildlife affairs. The bird was banded in Louisiana in December, 1953, and shot in October, 1954, by an unidentified hunter about 10 miles south of Cadillac.

Wildlife workers have been able to band only a small number of the long-billed little marsh birds; few of these are ever reported shot by hunters.

Altogether, 43 waters in 10 of the Upper Peninsula's 15 counties are open for early rainbow fishing. In addition to the inland waters, Lakes Superior, Michigan and Huron and the St. Mary's

'Skin Diving' Techniques Planned For Fish Studies In U. P. During Summer

Lakes Survey Crew Tested Setup In '54

MARQUETTE—Fisheries biologists will don the grotesque garb of "skin divers" this summer to probe the underwater secrets of Upper Peninsula lakes.

Merle G. Galbraith, Jr., of the Marquette office of the Institute

for Fisheries Research, said equipment will be made available late next summer to biologists in the Upper Peninsula for use in conjunction with lake surveys.

Excellent Research Tool

Galbraith last summer experimented with skin diving techniques on five Upper Peninsula lakes and has prepared a report on his findings. He sees underwater swimming equipment as an excellent tool in fisheries research and management and favors its extended use.

Dr. G. P. Cooper, Ann Arbor, associate biologist for the institute, said Galbraith and his un-

derwater lake survey party "performed much valuable service in lakes in the Marquette and Watersmeet areas."

Advantages Of Plan

Galbraith says skin diving techniques should prove valuable in several phases of fisheries research and management, including:

1. Observations in connection with life history study of fishes. Such activities as spawning and habitat preferences could be observed first-hand.

Checking On Survival

2. Ascertaining of levels in lakes where trout and other species stay during warm summer months.

3. Checking on survival and progress of fish newly introduced to lakes.

4. Verification of accuracy of new sonar-type depth finders in locating schools of fish.

Simplifies Collecting

5. Collecting species like bass and trout, which are difficult to net, and observing the size range and general abundance of various age classes of these fish.

6. Estimating fish populations in lakes.

Underwater Photography

7. Taking photographs underwater for studies where pictures would help clarify investigators' findings.

8. Recovery of valuable equipment lost in deep water.

Equipment used by Galbraith's party last summer included rubber fins attached to the feet to facilitate swimming, snorkel tubes (which project from the water to furnish oxygen to the underwater swimmer), face masks with glass lenses, a homemade air tank and spring-propelled spear for collecting specimens.

Fish Exhibited Curiosity

Observations in the five lakes surveyed by the underwater method disclosed that pan fish, yellow perch, suckers and minnows were unwary of swimmers when the latter were submerged, Galbraith said. "In fact," he remarked, "most fish exhibited a great amount of curiosity and swam to within a few feet of the observer."

The biologist stated that, on one occasion, he had no trouble in collecting four bass, a species which fisheries men find hard to take by present survey methods, and that he found underwater observations to be the only means of obtaining accurate information on bass populations.

Limiting Factors

Galbraith made observations not only of fish, but of bottom types, extent of vegetation and amount of cover available to fish at various depths.

"There are important factors which limit underwater swimming, such as dark or murky waters and low water temperatures," he said. "Three out of 17 lakes checked by the party last summer had waters which weren't transparent enough to make underwater observations practical."

"Although dark waters may never be overcome, the factor of cold waters can be overcome by use of a rubber suit," Galbraith added. "A suit of this type would make it possible to operate in all Michigan waters, including Lake Superior."

Wisconsin, New Jersey Tests

"At depths greater than 10 to 15 feet, a swimmer should have equipment employing compressed air. Otherwise, such observations are restricted to only a few seconds under the surface. Much energy and time is lost from repeated surfacing in order to replenish one's supply of air. The 'aquaslung,' or similar equipment, insures both freedom of movement and enough air for one-half hour submersion time, or more, depending on the size of tanks used."

Skin diving techniques already have been employed successfully by fisheries biologists in Wisconsin and New Jersey, and Galbraith hopes to prove next summer that the methods can be just as valuable in Upper Peninsula studies.

State Again 1st In Sale Of Licenses

More people hunted and fished in Michigan during the last fiscal year than in any other state. The state was not only first but led the U. S. to a national record sale of 32,654,199 hunting and fishing licenses.

California In Second

The U. S. Fish and Wildlife Service reported that Michigan accounted for 2,794,551 of the total sale.

California, sold 2,493,991 for second place nationally. Minnesota was third with 1,818,755 and New York took fourth with 1,784,727.

Fishing More Popular

Fishing as in past years was the most popular of the two outdoor sports. About 18,600,000 licensed anglers tramped up and down the nation's waterways during the year.

Almost \$85,000,000 poured into state and federal treasuries from the license sales.

California sold more fishing licenses than Michigan, but when trotted with hunting permits, the Wolverine State ranked above all others.

Northern Peninsula

OUTDOORS

Edited By KEN LOWE

Lake Shore Claims 1st Outboard Motor

IRON MOUNTAIN — The U. S. Patent Office may recognize Cameron B. Waterman of Detroit as the inventor of the outboard motor, but Lake Shore Engineering Company officials here and in Marquette place the credit elsewhere.

An article appearing recently on this page reported that Waterman, a member of the Huron Mountain Club in Marquette County who spends his summers there every year, has received numerous awards honoring him as the inventor of the outboard motor. Patent office records list Waterman as having invented the outboard motor in 1903.

Cite 1896 Date

Lake Shore officials contend, however, that the late Nels P. Flodin put together the first outboard motor in 1896 when he was chief engineer for Lake Shore.

It may be that the discrepancy in credit lies in this fact: Waterman had his invention patented. Flodin didn't.

At any rate, Lake Shore files show a newspaper account which credits Flodin with having invented the first outboard motor. A photograph of the motor appears

on one of Flodin's calling cards which is in the Lake Shore archives.

Its Maiden Voyage

"One day in the summer of 1896," the news story relates, "a row boat with two men in it and a queer collection of pipes and gears that were somehow bolted and screwed together to form an engine that hung over the stern left Freeman's boathouse in Marquette and traversed the 200 yards of water from the boathouse to the breakwater. There the queer device suddenly stopped its weird noises and the two men picked up their oars and rowed back to the boathouse."

"Thus the first outboard motor ever built had its maiden trip. Weighed 150 Pounds

"The motor was the invention of Nels P. Flodin, . . . H. S. Holly, and official of the (Lake Shore) company, had started the manufacture of gasoline motors at the engine works and one day he remarked to Flodin, 'Why won't one of those things hang over the end of a boat and work?' The result was the outboard motor designed by Flodin."

"The engine was a crude affair that weighed almost 150 pounds, according to Flodin, who recalls vividly his efforts to crank it."

'Thought We Were Crazy'

"Not only did I try, but everyone in the shop had a turn at it," he said. Down at Freeman's they thought we were crazy and when the thing finally started we were a little more surprised than the spectators."

"The motor had a bore of about three inches and a stroke of about three and a half inches. The sparking unit in the cylinder head was really a crude spark plug. We borrowed four or five dry cells from the telephone company for current and the batteries were placed beneath the rear seat, as was the gasoline tank."

Never Passed Breakwater

"For some peculiar reason we never could get any farther than the breakwater; the motor always quit on us there and we had to row back. On one side of the motor a hole was drilled and a hose run from this hole down alongside the side of the boat. The theory was that the rush of water would cause a circulation in the water jacket."

"Cranking was with a wheel just as today. The drive was through bevel gears and the motor steered with a tiller that enabled us to turn it through a 30-degree arc."

Brush Shelter Test Conducted On Urging Of Delta County Club

ESCANABA—Trout fishermen in this area, particularly those who are members of the Delta County Sportsmen's Club, are optimistic about results of a Conservation Department experiment undertaken at the club's suggestion.

The experiment involves Trout Lake, in Alger County north of Treenary, where the department last fall installed about 12 brush shelters to provide cover for trout. Officials of the Delta County Club, an affiliate of the Michigan United Conservation Clubs, commented that "this is another fine example of the existing cooperation between the sportsmen's clubs of the state and their own Conservation Department."

The brush shelter proposal came

up at a club discussion when members pointed out that Trout Lake, the headwaters of the east branch of the Whitefish River and a fine trout water in its own right, is full of springs, making for clear, cold water, but that the lake is not very deep and definitely lacked cover for trout. It was suggested that perhaps brush shelters would help.

Cliff Long, Escanaba, district fisheries supervisor for the department, was contacted. He attended the next meeting of the club, at which time the problem was explained to him. He agreed to try the brush shelter idea.

Last fall, the shelters were placed in the lake under his supervision. Each was marked with a pole

painted red. Long explained that, to his knowledge, this was the first time brush shelters of that type ever were used on a trout lake.

Long is interested in finding out what the results will be this coming season. He is urging all trout fishermen angling on Trout Lake to let him know what their creel results are there.

There's A Big Difference In Alfalfa, Say Experts

Read Tag On Bag And Check Its Origin

When you're buying alfalfa seed for spring seeding, be sure to read the tag on the bag. It will give important information you need in determining if it is suitable for this area.

The state law requires that the origin of the seed be printed on the tag. This will tell you if it is adapted for Michigan. Look for northern grown seed. You may run into blends of seed when buying

Egg Production Needs Early Start

If you're going to get in the egg business for the next laying season, you better get those chicks in, but quick. J. L. Heirman, Delta county agricultural agent, advises local poultrymen.

Heirman mentions that the Crop Reporting Service of the U. S. Department of Agriculture found this in a survey: Farmers all over the country on Feb. 1, planned on buying 18 per cent less chicks for laying flock replacements than a year ago.

But Heirman passes along this opinion from Henry Larzelere, Michigan State College poultry economist:

As egg prices strengthen, chick orders will tend to increase.

Larzelere points out that some folks that passed up early chicks are going to decide to get some medium or late chicks after all. This may mean that the number of April and May hatched chicks may exceed the same months a year ago.

This is why Larzelere would like to see poultrymen buy chicks right away. Instead of competing for the glutted late egg market a year hence, they will find their early eggs hitting the market at the right time.

In case some poultrymen are just now deciding on putting in some chicks, there are reports that some hatcheries have started chicks on hand, which may be a good buy for some Delta county poultrymen, Heirman says. These chicks sometimes eliminate the high mortality risk and housing through the coldest winter days.

4-H Fun Fest Set For March 26

A Share-the-Fun Festival will be held on March 26 in connection with the 4-H Achievement program.

The Achievement activities will be held at the William Bonifas Auditorium and Gym in Escanaba. Plans for the Fun program were completed at a meeting of the Delta County 4-H Council last week.

Two winning acts will be selected to represent the county in district competition at Camp Shaw. In 1954, forty-three different acts were entered; a tumbling act by Mary Ann Sinnave and Christine Vandecave and a vocal duet by Connie and Beverly Blixt were the winners.

Rules of the contest are:
(1) Two acts may be entered from a Club.
(2) Members completing projects last summer or this winter may take part.
(3) Acts may not be over 6 minutes long.
(4) Only one song or number in one act.
(5) Two acts will be selected to represent the county at Camp Shaw. Winners will pay the same camp fee as Style Revue winners.
(6) Entries should be in not later than March 24.

Good Eradication Program Necessary In Rodent Control

Are you killing a large number of rats and mice on your farm or your property, and they still seem to be increasing in number?

Delta County agriculture agent J. L. Heirman reminds that good rodents killing programs do little good unless you also practice good housekeeping.

He passes these suggestions along from Michigan State College Zoologist Miles D. Pirnie:

To discourage rodents, you should have proper food storage and sanitary disposal of wastes. New infestations can be prevented by continuous control. That means killing new animals with traps of poison bait stations.

Pirnie also suggests that it pays to "sell" rodent control to your neighbors and your community. He points out that if you have trouble with rodents, your neighbors may have the same trouble.

The M.S.C. zoologist has just released a folder on rat and mouse control. It tells about how to kill the rodents on your property and how to go about keeping it rat-free

alfalfa. Again we want to say be sure they are northern grown. The best advice we can give is to buy seed from reliable dealers. Avoid buying from unknown sources.

Some folks are asking what variety of potato to plant for an early market. An old variety that is early to mature is the Irish Cobbler but it is not resistant to scab or blight. It has its limitations in Delta County because of the scab problem. The same is true of Chippewa's. This variety matures about two weeks later than the Irish Cobbler.

A new variety, the Cherokee, is a few days later than the Chippewa but has resistance to scab and blight. Reports tell us it has good cooking quality. It is called a medium early variety and would be ready to harvest ten days before Russet Rurals if planted the same date. A few farmers will be growing them this year which will give us important information for the future.

A recent study showed that 27 per cent of urban families in Michigan were using Michigan potatoes. That still leaves 23 per cent buying out-of-state potatoes. We have made considerable progress in marketing quality Michigan potatoes. While we do not have any figures, we know that only a few years ago, the percentage of families consuming Michigan potatoes was much less. There is a considerable difference in price paid for Michigan potatoes and the prices paid for Idaho and Maine potatoes. The average price paid by Mrs. Consumer for Michigan potatoes is 3.3 cents per pound, Idaho potatoes 6.7 cents, and Maine 5.1 cents. We believe the difference will become less when more packaged potatoes, washed and waxed, hit our market.

How many farmers have their grain seed ready for the planting season? Now would be a good time to fan the seed to remove the weed seeds and the small kernels. You could also treat the seed for smut. Fanning and treating can give you an increase of as much as eight bushels per acre. It will certainly reduce the weed seeds planted with the grain.

Do you have some pasture land that still is good soil but hungry for something to eat? Fertilizer will do the job of feeding the hungry pasture. If the land is on the loamy side and has enough moisture, White Dutch Clover will come in where fertilized.

If you carry out the soil conservation practice, the A.C.C. program will help share the cost of the fertilizer. It is a good investment and should be tried to appreciate the results. We will be glad to make fertilizer recommendations for the practice.

Farmers in 1955 will receive about 43 cents of the consumer's marketing dollar. The remaining 57 cents will go to the marketing agencies. We want to mention this because some of the town people who read our column. They are consumers and when they buy food, we want them to know that the farmer does not get one-half of the dollar she spends.

Fertilize Trees And Shrubs Now

Delta County Agricultural Agent J. L. Heirman reports that he has been answering questions on when to fertilize trees and shrubs.

The answer is "right away." Heirman points out that complete soil fertilizers are most effective when put on in spring or early in the growing season. He explains that some property owners ran into trouble by applying fertilizer in the fall. The roots began a last minute growth and failed to harden in time for the winter cold.

The agent passes these recommendations along from William L. Love, Michigan State College extension municipal forester.

Apply fertilizer early in the spring around trees and shrubs, using 1½-3 pounds of complete fertilizer per 100 square feet of shrub bed area, cultivating fertilizer into the surface of the soil.

Love says chemical fertilizers can be used, such as 10-10-10 or 10-6-4. But avoid direct contact of soil fertilizer with the trunk or foliage, Love warns.

Figuring about three to four pounds per inch of trunk diameter in trees over six inches, start boring holes four to six feet from the trunk. Make the holes 12 to 18 inches deep and about two feet apart in the area under the branches. Put one or two cups of fertilizer in each hole and water it down and cover it with soil.

says Agent Heirman. He points out the extension folder, F-183, is available at the county office, or by writing the Bulletin Office at M.S.C. in East Lansing.

A Regular Weekly Feature Service
of the Escanaba Daily Press
Dedicated To Rural Residents Of This Area

Upper Michigan Dairying Is Still 'Big Business'

For quite a long time, "Bossy," the cow, has had Paul Bunyan's fabled "Blue Ox" on the run in the Upper Peninsula, reports Mason I. Smith, Marquette, district supervisor for the Bureau of Dairying of the Michigan Department of Agriculture.

Smith says the day of a log shack barn and a haystack is gone and dairying has become big business.

This area produced about 35 million dollars worth of business in dairy products each year for the last several years, he said.

There is a trend to consolidation of both farms and plants into larger business units.

Eight years ago there were well over 300 licenses issued to dairy plants of all types in the Upper Peninsula.

Fewer But Bigger
Now there are less than 200. But each operation is a larger business, Smith said.

Bigger and better farms market their milk through 23 cheese factories, 54 bottle plants, 16 creameries, one condensery, 16 major ice cream manufacturers, and a large number of smaller "Counter Freezer" type operations.

These plants, under supervision of the Michigan Department of Agriculture, have steadily improved their facilities and their products, he said.

The products of the dairy industry in the U. P. are second to none in quality, Smith asserts.

The cheese industry uses the greatest amount of milk, he said, with the bottle milk plants coming second.

Most of the farms sell whole milk to the plants with farm separator.

Ford River Youth To Be Honored At Achievement Meet
Everette Dahlvik of Ford River will receive a Certificate of Merit for outstanding work in 4-H Conservation leadership.

The award is made by the Michigan Chapter of Soil Conservation Society of America.

The certificate will be presented by Irwin TenHaken, Soil Conservationist, at the Spring Achievement program, March 26 at the William Bonifas Auditorium.

Mr. Dahlvik has led the Ford River 4-H Conservation Club for the past three years.

The club has had experience in tree planting, has made two deer-yard trips and has had field trips to the Manistique and Munising areas. In 1954, the club was one of fifteen in the state to win a cash award for having an outstanding recreation program.

Mr. Dahlvik is president of both the Delta County and the Upper Peninsula 4-H Councils and is a member of the State 4-H Council.

Legals
March 4, 1955 March 18, 1955
STATE OF MICHIGAN
The Probate Court for the County of Delta.
In the Matter of the Estate of Margaret I. Patton, Deceased.
At a session of said Court, held on March 2, A. D. 1955.
Present: Honorable William J. Miller, Judge of Probate.

Notice Is Hereby Given, That the petition of Catherine Manley, praying that the administration of said estate be granted to William J. Manley, or to some other suitable person; and that the heirs of said deceased be determined, will be heard at the Probate Court on March 2, A. D. 1955, at ten A. M.

It Is Ordered, That notice thereof be given by publication of a copy hereof for three weeks consecutively previous to said day of hearing, in the Escanaba Daily Press, and that the petitioner cause a copy of this notice to be served upon each known party in interest at his last known address by registered mail, return receipt demanded, at least fourteen (14) days prior to such hearing, or by personal service at least five (5) days prior to such hearing.

MANISTIQUE

FLYING FIRE TRUCK—Something different in fighting fires is the aim of the Piasecki Helicopter Corp. of Morton, Pa. As an artist has illustrated the idea above, a specially designed 'copter could reach burning planes downed on mountainsides, in swamps, forests or other places inaccessible to wheeled equipment. Rescue workers would be lowered to the ground

while the flying fire truck hovers over the fire spraying an extinguisher from its crane-like front. Flames would be kept away from the 'copter by its whirling rotors. The manufacturer says it could be used in fighting fires in upper stories of high buildings. Note truck bogged down in swamp.

Basketball Awards Are Presented Here Today

Basketball honors were presented to 10 varsity and 15 reserve players in Manistique High School at an assembly, conducted in the school auditorium at 2:45 p. m., today.

One varsity player, William Holm, a senior, received a third year letter in the awards assembly. Second year awards were presented to Donald Anderson, Robert Corson, Kenneth Dixon, Robert Hastings and Student Manager Edward Leonard, all seniors, and Eddie Bernier, a junior. Corson also received a star, as team captain, and a similar award was made to the co-captain, Robert Hastings.

First year letters went to the following varsity players: David Book, Benjamin Gero and George Phillips, all of whom are juniors. Honorable mention for varsity players was awarded three other juniors, Richard Morton, Elmer Reichhoff and Ralph Williams.

Reserve players receiving awards were Albert Ackerman, Earl Anderson, John Belleville, Francis Bernier, William Berger, Dennis Boyd, Roger Dybevik, Michael Farley, Wayne Gunderman, Gary Olson, Robert Ranguette, Paul Reque, Sylvester Ruck, Erling Wolfe and Patrick Malloy.

Awards also were presented to cheerleaders, including Wanda LaBar, who received the 3-year letter.

award. Other cheerleaders taking honors were Patricia LaLonde, second year award, and Carol Fiebertz, Sherry McNally, Katherine Gauthier and Eleanor Soligny, first year letters.

The program opened with the flag pledge, led by cheerleaders. Reserve awards were presented by Coach Richard Berger, after which the Code of the "M" was explained by William J. Cook, athletic director for the high school. Cook presented awards to cheerleaders, and varsity awards were made by Coach Rudie Brandstrom.

Brandstrom, Cook Will Attend GL Conference Meet

Coach Rudie Brandstrom and William J. Cook, athletic director of Manistique High School, are scheduled to attend a meeting of Great Lakes conference officials in Munising March 24.

Plans for the conference track tournament, slated May 7, are to be discussed, as well as admission of new schools in the conference and revision of policies. Presentation of the award plaque to Gladstone, the GL conference basketball champions, also is to be considered.

Manistique is tentatively scheduled to hold a track meet here with Stephenson April 16, if weather permits.

Obituary

MRS. IDELLA SHIRK
Funeral services for Mrs. Idella Shirk, 67, of Blaney Park, who died Tuesday at Schoolcraft Memorial Hospital, were held at 2 p. m., Thursday at Messier-Brouillette Funeral Home with the Rev. A. Barton Brown, pastor of the First Baptist Church, officiating.

During services Mrs. Julius Setorin Hospital, were held at 2 p. m. between sang "Abide With Me" and "The Old Rugged Cross." She was accompanied at the organ by Mrs. Harry Ahlstrom.

Pallbearers were Beryl, Norman, Gerald and Lawrence Shirk, Ervin Diller and James Carefelle. Burial will take place in the spring in Fairview cemetery.

KEEP YOUR HOME

Beautifully Comfortable
WITH
FLINTKOTE
*Narro-Lap**
INSULATING SIDING

There's new home comfort, plus new beauty, too, in Flintkote Narro-Lap Siding. Colorful mineral granules, firmly anchored in the rugged asphalt coating, give your house a long-lasting beauty—in colors that harmonize with any type of home.

Even more exciting are the interesting proportions of Narro-Lap. This handsomely designed siding, time-proved since Colonial days, has hidden out many a storm.

Based on Flintkote's specially-made insulation board, treated with weather-defying asphalt saturants, Narro-Lap is resistant to heat and cold as well as rain, snow, ice and wind.

Narro-Lap, with over 20 times the insulation value of concrete, helps pay for itself by cutting your fuel bills. Come in. See samples of Flintkote Narro-Lap Siding.

Trucker Pays \$45 On Traffic Charges Here

Lawrence A. Meyer, 812 Sheridan road, Escanaba, paid fines and costs totaling \$45 in Justice court here Tuesday afternoon and two of his truck drivers were ticketed by State police.

Meyer was levied fine of \$3 and costs of \$2 for not having safety chains on a trailer and \$25 fine and costs for not having an MPSC permit.

One of his drivers, Richard Wartello, of Newberry, was assessed fine of \$3 and costs of \$2 for not having a license plate on logging bunks and \$3 fine and \$2 costs for not having mud guards on a truck; and the other, Gordon A. Brunette, 329 S. 10th St., Escanaba, was assessed \$3 fine and \$2 costs for defective brakes.

In other Justice court cases Thursday, Elroy J. Mersnick, 135 N. Houghton, paid \$2 fine and \$2 costs for failure to stop at an arterial and \$8 fine and \$2 costs for speeding; Henry J. Nelezen, Vulcan, paid \$3 fine and \$2 costs for not having a valid license on a vehicle; and Franklin T. Burgess, 330 Walnut St., paid \$8 fine and \$2 costs for excessive speed for conditions.

Schuster Guest Of Honor Today At School Assembly

Jon Schuster, Manistique High School debater, who won the state debate championship at Ann Arbor Wednesday was guest of honor at a special student assembly held this morning at the school.

The program included a talk by Marvin Fredericksen, Manistique High School debate coach, who described the state-wide contest, held Tuesday and Wednesday in Ann Arbor. Manistique High School had two contestants entered. They were Schuster who placed first and Mary Ella Giovannini who placed seventh in the semi-finals. A total of 20 students were entered.

Also on the program were Irish songs by Earl Cousineau. The Manistique High School debate squad which earlier this year won the Upper Peninsula championship returned from Ann Arbor Thursday night.

Briefly Told

Fire Call—Manistique firemen were called a 12:20 a. m., Thursday when a car owned by Jack R. Kayser of Trenary, caught fire two miles west of Thompson. There was some extensive damage to the car, firemen reported.

Confirmation Class—St. Alban's Episcopal confirmation class meets at 9:30 a. m., Saturday in the church.

Altar Guild—The Junior Altar Guild of St. Alban's Episcopal Church will meet at 3:30 p. m. Saturday.

VOLCANIC VENT FORMS—Steam, sulphurous smoke and lava spurt from elongated fissure in the earth at Pahoa, Hawaii, as scientists grab their instruments and rush from danger. This

photo, part of a series showing the birth of a volcanic vent, is one of the first ever made of this natural phenomenon. (NEA Telephoto)

Five Fined For Selling Walleyes

Selling walleyed pike caught by hook and line by persons not licensed as commercial fishermen has brought grief to at least five persons and more may be involved, it is learned from Conservation Officer Glenn Price, Gladstone.

Larry Laraby of the Flooring Plant Addition and Floyd Ackerman of Kipling pleaded guilty to the charge and each was fined \$25 and assessed court costs of \$7.80.

Frances Lagina, Kipling, was unable to pay his fine and took the alternative 15-day jail term.

Shirley Buckmaster, city, and Jay Cook, Route 1, Gladstone, were each fined \$10.00 and assessed court costs of \$7.80.

The fish were sold to a local commercial fisherman.

City Briefs

Mrs. Esther Gabe has returned from Grand Rapids where she has been visiting with her son Leland and family.

Mr. and Mrs. David Hargrave are expected to arrive from Neenah, Wis., this evening to spend the weekend at the home of Mrs. Hargrave's parents, Rev. and Mrs. Theophil Hoffmann.

David Stock arrived yesterday from Angola, Ind., where he is attending Tri-State College, to spend the mid-term vacation with his parents, Mr. and Mrs. Connie Stock.

Obituary

MICHAEL F. STEMAC

The rosary will be recited at 8 tonight at Skradski Funeral Home for Michael F. Stemac, whose funeral will be held at 9 a. m. Saturday with a requiem mass at All Saints' Church. Burial will be in the family lot at Fernwood Cemetery.

Dog Ordinance Violation Cited

Wayne Louis, Superior Ave., pleaded guilty before Justice A. T. Sahlberg to a charge of allowing a dog to run at large and paid a fine of \$2.00 yesterday afternoon. Complaint was made by Orrie Switzer, county dog warden.

Bachelor Cop Delivers Baby

DETROIT (AP)—Three married men ducked out but bachelor Patrolman Edward Schmidt stayed on to deliver a son to Mrs. Marion Underwood. Patrolman Schmidt and his scout car partner answered a call to her home.

"Two ambulance men came," Schmidt said, "but the next thing I knew there were only two of us in the room and then the other man left and I was alone. It was the first time in my seven years on the force that I ever had to deliver a baby."

Doctors said Schmidt did a capable job and the mother and son are "doing fine."

BRITISH-BORN PRESIDENTS

Eight Presidents of the United States were born British subjects: Washington, Adams, Jefferson, Madison, Monroe, John Quincy Adams, Jackson, and William Henry Harrison.

Mission Festival Sunday Evening

The Women's Missionary Society of the First Lutheran church is sponsoring a Mission Festival Sunday evening at the church. A program will be presented and refreshments served.

The program is composed of a playlet entitled, "Challenge of The Cross." The Mmes., Clifford Peterson, Norman Nelson, Arne Johnson, Fred Pepin, Clarin Fredrickson, Roy Olson, Carl Westerbach, and Robert Olson will take part in the play. A choir, consisting of the Mmes., Harold Apelgren, Ray Long, Gordon Marshall and Cora Sue Pepin will furnish the singing and vocal numbers.

Members of the Missionary Societies from Bark River, Rapid River, and Perkins Lutheran churches are invited to attend.

A social hour will be held after the play and lunch will be served. The committee for the evening is composed of the Mmes., E. C. Perkins, Eric Apelgren, Agnes Olson, Bertha Ades, John Kegel and Leonard Elquist.

Social

GIA Meeting

Mrs. William Birmingham entertained the members of the GIA at her home on Wednesday afternoon. A social hour was held after the business session. Mrs. Elmer Green held high honors in five hundred and Mrs. Joseph Wein-gartner in smear.

Lunch was served at the close of the afternoon.

Study Club

Mrs. Walter L. Olson will entertain the Study Club at 2:30 Monday afternoon at her home at 1909 Minnesota Ave. Mrs. Byron H. Skellenger will review the book "R. S. V. P." by Elsa Maxwell.

Tourists anxious to view Niagara Falls spend an estimated \$21,000,000 annually.

Course Planned For Secretaries

A special session or course for secretaries will be given at Gladstone high school on the evening of Wednesday, April 13, under sponsorship of the Gladstone Chamber of Commerce in cooperation with the Adult Education department of Gladstone High School.

Arrangements for the course were made yesterday by Prof. W. A. Chojnowski, retail consultant, Northern Michigan College of Education, Marquette, and Atty. Clair Hoehn, president of the Chamber of Commerce.

A film on short cuts in office procedure will be shown and there will be a demonstration of various types of office machinery and electric typewriters. There also will be a short talk.

Refreshments will be served. While the major cost of the course is being borne by the Chamber of Commerce, a moderate fee will be charged the various persons attending the course.

If response to this course is satisfactory, a course in sales technique may be given here at a later date.

Furnishing Beer To Minor Costly

Pleading guilty to a charge of furnishing intoxicants to a minor, Carl Seefeld, Kiva, was fined \$50 and assessed court costs of \$4.30 when arraigned before Justice of Peace A. T. Sahlberg Thursday.

He has been committed to 30 days in the Delta County jail pending payment of his fine.

It is believed that the Egyptians first began to work metals some time before 4,000 B.C.

With Roy Crandall

The Escanaba Hawks have a tough task ahead of them as they open defense of their championship Doc Gibson Cup in the Northern Michigan-Ontario Hockey league playoffs . . . The Canadian Soo Esquires are a mighty good hockey team, there's not a doubt . . . But the Hawks did it before and they may be able to do it again.

Let's take a quick look at these season and playoff records of the two teams . . . The Canadians, playing only on the road this past season, won 10 games, lost one and tied three, scoring 72 points to 40 for their opposition . . . The Hawks also won 10 games but lost eight and tied six, scoring 109 points to 118 for opponents.

Breaking those scoring figures down to percentages, the Hawks compare favorably on offense but not on defense . . . Escanaba has scored an average of 4.5 goals per game while the Canadian Soo has an average of 5.1 . . . On defense the Hawks have allowed 4.9 goals per game while the Canadians have held opponents to 2.8 . . . The only loss the Canadians suffered was in a 1-0 game at Calumet . . . However, the Hawks pinned two 4-4 ties on them.

Switching to basketball, some of the older readers may remember Gordon Aley who played football at St. Joe in the middle 1920's . . . His son Tom is now a headline sports star himself at Elgin, Ill. . . Tom, a 6-6 center, is the leading scorer on the Elgin team that recently notched a 51-43 victory over Georgetown to move into the quarterfinals of the Illinois state high school basketball tournament . . . He scored 22 points in the game and hit for 37 in a previous tourney tilt.

Coach Bruce Warren of Trout Creek's championship Class E Anglers isn't too concerned about the future . . . He loses only two of the six players who saw action in the title game against Alpha here last week . . . Ron Sloma, a 400-plus scorer this season, is a junior . . . And tall guard Jim McLaughlin is only a sophomore.

An unhappy incident marred the state cage tournament quarterfinals at Grand Rapids Wednesday night . . . Charles Forsythe, MHSAA director, is investigating charges that M. C. Burton, Muskegon Heights star, punched referee Al Krauchunas of Battle Creek after Burton's team lost to Benton Harbor, 43-34.

Don LaChapelle, outstanding Escanaba weight-lifter, is now in Minneapolis where he continues to be active in weight lifting and body building . . . He has had physical culture pictures accepted by several leading magazines.

Pris Rousseau picked up the 2-7-10 split and Merelyn Davidson the 6-7 spread in K. C. Monday League action.

Tigers Get Breaks; Snap Losing Streak With 3 To 2 Victory

CLEARWATER, Fla. (AP)—It took every break the Tigers could get plus a hairline decision by umpire Bill Summers in the ninth inning for Detroit to snap a three-game losing streak Wednesday.

The Tigers defeated the Philadelphia Phillies, 3-2, at Lakeland—but nobody was impressed.

The disputed decision came when Summers ruled Al Kaline beat out a toss at home from Philadelphia's third baseman Bobby Morgan for the winning run.

The Phillies yelled that Kaline didn't beat the throw and didn't even touch home plate. But that wasn't the way Summers saw it.

Kaline Pinch Hitter

Kaline, who was out of the starting lineup with a sore arm, reached first on a fielder's choice after pinch-hitting for pitcher Dick Marlowe. He moved to second on an error and went to third when Reno Bertoia beat out an infield scratch. Then he scored when Jack Phillips bounced one to Morgan.

It was Detroit's third victory in eight springtime exhibition games against big league competition. But the Tigers—still lacking a sustained batting attack—collected only six hits of Philadelphia while the Phillies got 10 off Detroit.

Philadelphia rookie Jim Owens held the Tigers scoreless for four innings. Detroit scored twice in the sixth of another rookie, Bob Greenwood, who replaced Owens. Greenwood gave singles to Chick King, subbing for Kaline and outfielder Bill Tuttle. Then he walked the next two batters to force in the first Detroit run. The other score that inning came on a flyball.

Bob Miller Starts

The Phillies scored once against rookie Bob Miller who pitched the

Iowa Takes On LaSalle Champ

KANSAS CITY (AP)—The LaSalle Explorers defended their National Collegiate basketball crown against Iowa's Big Ten champion Hawkeyes tonight in the semifinal round of the 17th NCAA tournament.

Following the LaSalle - Iowa opener, the western delegates-San Francisco and Colorado—will clash.

Coach Ken Loeffler's Explorers, featuring All American Tom Gola, have a 25-4 record.

Iowa, coached by Bucky O'Connor, have a winter-long record of 19-5.

San Francisco's Dons, beaten once in 27 games, was rated the nation's No. 1 team at the end of the regular season. Coach Phil Woolpert's All America Bill Russell, 6-4 center, may be called upon to carry an extra load since Jerry Mullen, a top defender, is hobbled by an ankle injury.

Coach Bebe Lee's Colorado Buffaloes, Big Seven champions boast a solid team headed by 6-7 Burdette Halderson. Their record is 18-5 for the season.

First Division Finish Would Delight Senators Who Lead In Grapefruit

By THE ASSOCIATED PRESS

The Washington Senators would be content to wind up in the first division in 1955.

Since they last won the American League pennant in 1933, the Senators have been in the first division only five times.

Manager Chuck Dressen, who led the Brooklyn Dodgers to National League flags in 1952 and 1953, has his Senators atop the Grapefruit and Cactus League standings today with a 4-2 won-lost record.

Yost Gets Homer

He thinks his club has a chance provided the "big guys don't get hurt." He meant first baseman Mickey Vernon, outfielder Jim Busby and third baseman Eddie Yost.

One of the "big guys," Eddie Yost, homered Thursday as the Senators defeated the Cincinnati Redlegs 6-4 for their fourth straight victory.

The Boston Red Sox broke a three-game losing streak by whipping the Milwaukee Braves 8-5. Billy Goodman collected three hits and batted in three runs.

Al Kaline scooted home from third base on Jack Phillips' slow infield roller in the ninth inning to give the Detroit Tigers a 3-2 triumph over the Philadelphia Phils.

Yanks Take Cards

The New York Yankees turned back the St. Louis Cards 7-4, getting three unearned runs in the eighth inning to snap a 4-4 tie.

The Kansas City Athletics received effective pitching from Art Ditmar and Marion Fricano and downed the Chicago White Sox 8-2. Bob Nieman of the Sox produced four hits.

Chico Fernandez's error on Gus Triandos' double-play grounder let in the winning run as the Baltimore Orioles nosed out the Brooklyn Dodgers 5-4 in 10 innings.

In another extra-inning game, the Chicago Cubs outlasted the Cleveland Indians 8-7 in 11 frames.

HOUGHTON ORANGUTANGS—The defending champions of the Class A division of the Hermansville Gold Medal tournament are pictured above with their trophy. The Houghton Orangutangs will be back in action in the 17th annual tournament which gets under way at Hermansville tomorrow and runs for nine consecutive days. Kneeling, left to right: Glen Hultquist, Jim Mayer, Gary Lundin, Jimmy Luecker, Jack Erickson, Tim Corcoran, Herman Gierow, Don Mick, Ron Havel and Lee Schemmel.

Three U. P. Quints In State Semis Tonight

By JOE FALLS

EAST LANSING (AP)—Sixteen title-minded teams—10 of them looking for their first championship—collide tonight in the semifinals of the state high school basketball tournament.

The only defending champion left in the running is River Rouge, the Class B king which now is favored to make it two titles in a row.

Semifinal action will take place at three sites: Class A and B in Michigan State College's Jenison Fieldhouse; Class C at Lansing Boys Vocational High School, and Class D at Lansing Sexton High School.

Houghton Is Favored

The eight survivors—and it's anybody's guess who they'll be—will square off Saturday in an afternoon-evening session in Jenison Fieldhouse.

The six former titleholders are Jackson (1929-48), Benton Harbor (1941) and Highland Park (1952) in Class A; Negaunee (1930) and River Rouge (1954) in Class B; and Mass (1948) in Class D.

There are no former champions in Class C, but Houghton, with a strong 21-0 record, must be considered the team to beat.

Many observers feel the winner of tonight's Benton Harbor-Flint Central game will go on to take the Class A title.

Flint Red Hot

Flint Central, in particular, is a "hot" team, having won 13 of its last 14 games—including that somewhat unbelievable 93-62 rout of Saginaw Arthur Hill, champion of the Saginaw Valley, in Wednesday's quarterfinals.

Similarly, Benton Harbor probably is playing its finest basketball of the season. The Tigers have won their last eight games, including a convincing 43-34 victory over Muskegon Heights, the defending champion, in the quarterfinals.

The other Class A semifinal, pits Jackson and Highland Park. Neither showed an abundance of power during the regular season, although Highland Park won the Border Cities championship.

Negaunee Faces Champ

In Class B, River Rouge, with only one regular from last year's championship team—Blanche Martin—meets Negaunee, one of three Upper Peninsula squads still alive.

The other Class B game pits Buchanan, the spoiler which ended Lansing St. Mary's gaudy winning streak at 37 games, and Birmingham-Troy, which is in the semifinals for the first time.

In Class C, Houghton meets Holt and Detroit St. Bernard faces Wayland. In Class D, Coldwater St. Charles tangles with Mass and Ashley meets Mt. Pleasant Sacred Heart.

The smallest school is Coldwater St. Charles, which has an enrollment of only 73. The largest is Flint Central, with 2,519.

Stan Hack Faces Tough Job With Chicago Cubs

By JACK STEVENSON

MESA, ARIZ. (AP)—The Chicago Cubs count on a youth movement to push the club out of the National League second division but manager Stan Hack faces a tough assignment with a long way to go.

A regular catcher, a couple of hitting outfielders and pitching strength are the items most needed.

Expected to form the nucleus are slugger Hank Sauer in left field, Ransom Jackson at third base, Dee Fondy at first and the combination of shortstop Ernie Banks and second baseman Gene Baker.

Veteran Catchers

Veteran catchers Walker Cooper and Clyde McCullough are back but Cooper is 40 and McCullough 37. Harry Chitt, a 225-pounder, gets his big chance to become the No. 1 receiver after a couple of years of army duty.

In the pitching department, left handers Paul Minner and Jim Davis with veteran right hander Bob Rush and newcomer Sam Jones could form the front line.

"I'm expecting great things of Jones," Hack says of the fast ball pitcher who came to the Cubs in the deal that sent Ralph Kiner to the Cleveland Indians. He had a shot with Cleveland in 1952 but a sore arm cost him his chance. He spent last season with Indianapolis in the American Assn.

Bubba Church Back

From the minors come several aspirants. Bubba Church and John Pyecha are up from Los Angeles.

Hawks Are Ready To Defend Doc Gibson Cup In Series Against Canadian Sextet

The Escanaba Hawks will open defense of the Doc Gibson Cup in the championship playoff series against the Canadian Soo Esquires at the Marquette Palestra Saturday night at 8.

The second game of the best-of-five series will begin at 2:30 Sunday afternoon at the Palestra. Plans for the remaining games in the championship series have not yet been announced.

Coach Mark Olson announced today that all the Hawks are in perfect physical and mental shape for the opening game of the playoffs. All out-of-town members of the team will be available for the two-day opening set at Marquette.

Fans Will Travel

From 200 to 300 Escanaba fans will be on hand to spur the Hawks on to their best efforts in the important championship finals. Ticket inquiries have been received from Manistique, Gladstone, Iron Mountain and Niagara, Wis., and it is expected also that scores of Copper Country fans will attend.

Coach Mark Olson put his Hawks through fast workouts Wednesday and Thursday nights in preparation for the finals. Having captured the Gibson Cup in only their fourth season in NMO competition the Escanaba Hawks are determined to keep the cup.

Emblematic of the Upper Peninsula championship, the Gibson Cup was won by the Hawks last season after semifinal and final series against Marquette and Portage Lake, respectively, both of which went the limit.

Actually, the Hawks finished the 1954-55 schedule atop Upper Peninsula teams, placing second ahead of Houghton, Calumet and Marquette in that order, but this season they have the Canadian Soo to contend with and as the man-on-the-street said: "It won't be easy!"

Have Best Chance

But it is decidedly possible, and close observers of the NMOHL hockey scene declare that Escanaba is better equipped than any other team in the league to cope with the Canadian Soo in the best-of-five finals. The Hawks tied the Esquires twice by 4-4 during the regular season.

Reserved seat tickets for the Saturday night and Sunday afternoon games in Marquette are now on sale at the Quality Home Furniture and Gust Asps.

A special bloc of 200 seats has been set aside for Escanaba fans. They are "center ice" seats and also seats back of the Hawk player bench and immediately north of the players. All of which shapes up as a solid cheering section for the Escanabans.

Tickets Available

Fans who may be unable to make reservations until the bloc of 200 is sold may still reserve good seats by telephoning Richards Sports Shop, Marquette, until 5:30 p. m. Saturday. Tickets for Sunday's game may be reserved by telephoning the Palestra Sunday morning.

The Gibson Cup, which has been on display at several business establishments in Escanaba since last winter, is now being displayed at Richards Sport Shop in Marquette.

Escanaba's goal is to return it to Escanaba for another year by beating Canadian Soo in the finals.

Men's City Dartball Tourney Under Way

SPT—MENS CITY

First games in the Men's City Dartball tournament will be played tonight at Carpenters Hall, starting at 7.

Nine teams are entered in the tournament which will be continued Saturday night. Championship, runnerup and batting trophies will be awarded to the top teams and individuals.

Pairings tonight:

Press vs. Carpenters.
Birds Eye vs. Colonial.
Buck Inn vs. Eddy's.
Blatz vs. Spar's.

Houle's vs. Press - Carpenters winner, 9 p. m.

Eddy's Bar, first half champion, also won the second half crown with 22 victories against 8 defeats for a .730 average. Spar's and Buck Inn were tied for second and played a three-game series to break the tie with Spar's coming out on top. Each team had a 21-9 season record.

Wally Hebert, cleanup man for Eddy's Bar, won the individual batting championship with a .527 average, compiled on 98 hits in 186 times at bat. Jim Rose of Spar's was runnerup with a .490 average.

The other teams, in order of finish in the final standings, were Colonial, Birds Eye, Press, Kessler's, Carpenters, Post Office, Houle's and Blatz.

Rodman's Quint Tops Al's 82-64

HERMANVILLE — Rodman's Bar quint tuned up for the coming Gold Medal cage tourney here last night by trimming Al's Tavern of Escanaba 82-64.

Ahlard and Machalk led the winners with 27 and 26 points. Dick Cass was tops for Al's with 16 and Dick Bryson scored 14.

Box score:

Rodman's	FG	FT	PF	TP

Argentina Tops U. S. Cage Team

MEXICO CITY (AP)—Argentina is a somewhat hysterical leader of the Pan American basketball tournament today, victor over a United States team that was supposed to take the championship with comparative ease.

The Gauchos, led by that veteran of Olympic basketball, lean Oscar Furlong, beat the United States 54-53 Thursday night amid scenes of confusion and ecstasy and now appear to have the Pan American title in the bag.

It was a great game, one that had a crowd of 10,000 in pandemonium. Argentina led virtually all the way, once being ahead by 13 points, but the Americans closed in down the stretch and with 59 seconds left the score was tied 53-53.

Argentina had the ball and was working in toward the U. S. goal when Roberto Viau cut for the basket and shot. Alva Wilfong of the U. S. went for the ball but fouled him.

Viau's first free throw was short but his second was good.

Brazil swamped Venezuela 86-44 in another game in the men's division while Mexico beat Canada 58-41 in the women's division.

Sentinels Win 7-5 As Bukovich Plans Finale

MARQUETTE — Hockey fans and officials cheered and honored Tony Bukovich in pre-game ceremonies at the Palestra arena last night, but in the ensuing tussle goalie Jack Yinder and his Sentinel teammates held the veteran Portage Lake star scoreless.

All of which helped the Marquette team take a 7-5 decision from the Pioneers in an exhibition game played before 974 spectators.

Wrigley Field, home of the Chicago Cubs, was once the home of the Chicago Whales of the Federal League.

Sentinels Win 7-5 As Bukovich Plans Finale

Pro Boxing Fans On Decrease As Result Of Televised Bouts

By JOHN CHANDLER
The Associated Press

Interest in boxing generally has decreased in 23 states during the last five years, irrespective of televised bouts, a nationwide survey of The Associated Press disclosed today.

Reports from 48 states and the District of Columbia seem to bear out the claim that widespread televising of fights has put a big majority of small fight clubs out of business.

Iowa is the only state where boxing is illegal by law. The usual bill to legalize the sport in Iowa is in the Legislature again, but isn't expected to get out of committee.

Pro Bouts Only

The AP survey concerned boxing as a professional sport, and many areas which reported little interest modified this by observing that it did not include TV bouts or Golden Gloves and other amateur fisticuffs. TV interest seems as strong as ever.

The sport was termed savage in 16 states, and very active in only a four — Michigan, New York, Illinois and Florida.

The large cities, with some fight clubs getting financial support from television, appeared to spearhead interest in states where boxing shows are held more or less regularly.

These include Chicago, Detroit, Miami, New York, Philadelphia, Milwaukee, San Francisco, Boston, Los Angeles, Butte and Washington D.C.

Delaware, Indiana, New Jersey and Vermont said pro boxing virtually was dead. A survey in Indiana showed "no outstanding fighters in the state and attempts to stage bouts with good outsiders have failed miserably at the gate."

Increased interest in the last five years was reported from Alabama, California, Colorado, Florida, Idaho, Illinois, Louisiana, Michigan, Nevada, New York, Washington and the District of Columbia.

In St. Louis the International Boxing Club was blamed for a "spasmodic" condition. "The IBC booked nine dates into the St. Louis Arena for the winter season so far has reneged on the first six," it was reported. Omaha reported the last 14 shows three lost money.

Fewer Boxers Around

Nine indoor championship fights in Chicago since 1949 averaged 16,500 in attendance, but Illinois admitted "the dearth of club fighting and amateur shows since TV unquestionably drastically reduced the number of boxers, as long claimed by the small promoters."

Michigan reports an increase in five years due to expansion of small club fighting in Detroit, Saginaw, Grand Rapids, Flint and Lansing. Due to a Michigan tax on TV boxing is a dead issue on a national level, with only one nationwide TV show from Detroit Olympia in nine months.

Girl Describes Life With Jelke

NEW YORK (AP)—Pat Ward testified Thursday she made between \$10,000 and \$15,000 as a call girl while living with oleo heir Minot (Mickey) Jelke and turned most of it over to him.

The willowy Brunette, 21 years old, said she shared Jelke's east side apartment for several months in the winter of 1951-52.

A jury of 10 men and 2 women is trying Jelke in general sessions on a charge of inducing Miss Ward to lead the life of a prostitute to help support him while he was waiting an inheritance.

Wednesday she had reeled off a list of men she said paid her from \$50 to \$200 for her favors.

Asst. Dist. Atty. Anthony J. Liebler asked her again to tell "how much money you made on dates from the time you first went to live with the defendant until the time he went to Florida and while you were with Erica Steele."

"It was quite a lot," she said, hesitatingly. "I suppose between \$10,000 and \$15,000."

"Did you give any of that money to the defendant?" Liebler asked.

"Yes, sir," she said.

To a question of how much, she replied:

"I would say most of it. I don't know what percentage."

Matusow Receives 3-Year Term For Criminal Contempt

EL PASO, Tex. (AP)—U. S. Dist. Judge R. E. Thomason sentenced turnabout witness Harvey Matusow to three years in federal prison for criminal contempt of court.

Judge Thomason ordered Matusow remanded to the custody of the U. S. marshal. He set bond for

appeal at \$10,000. It was not immediately learned whether Matusow would post bond, although he had said earlier he would "be in jail only a few hours" if he were adjudged guilty of contempt. He said it would take him only a short time to raise the bond money.

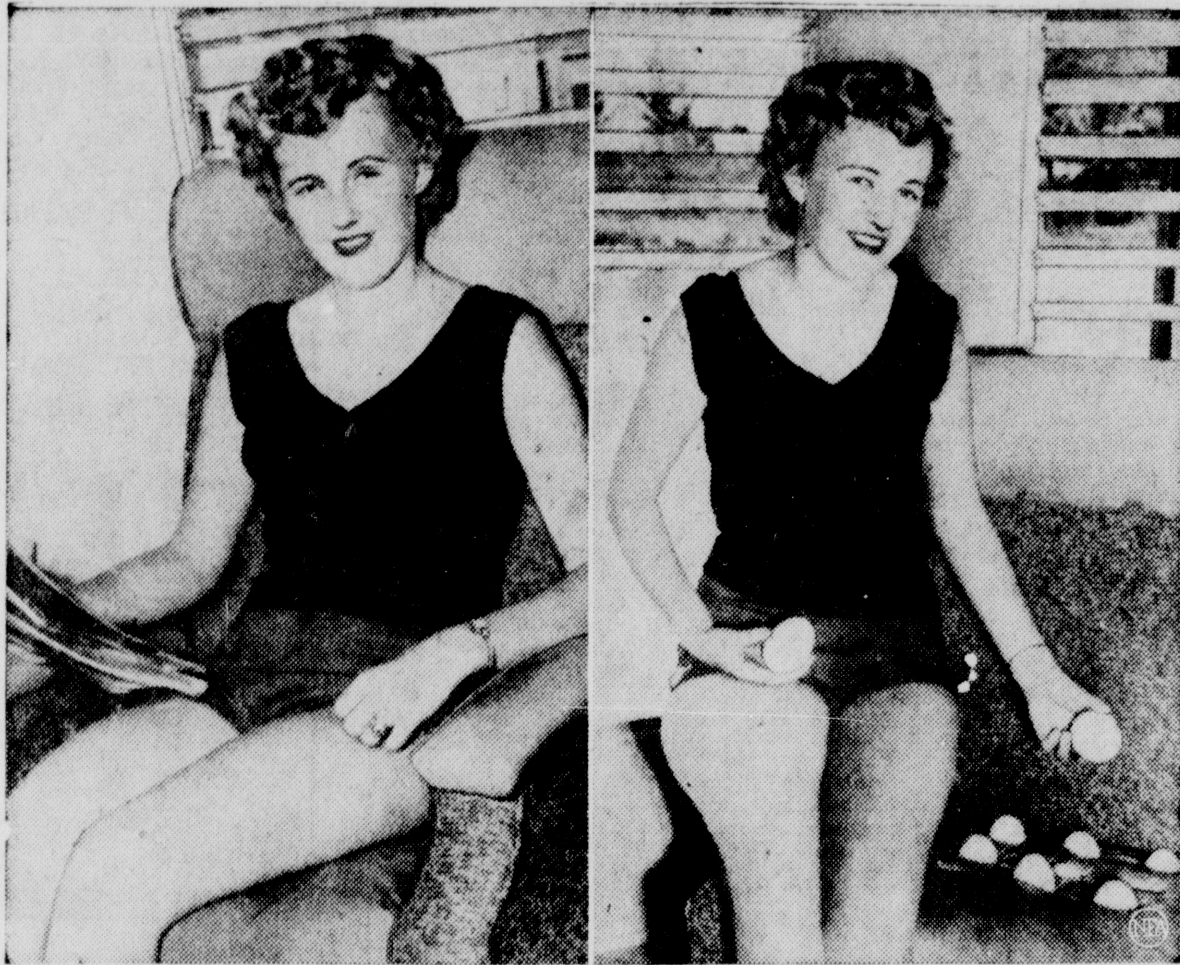

Matusow was held in criminal contempt of the federal court of "maliciously lying" in an attempt to gain a new trial for Clinton Jencks, an official of the International Union of Mine, Mill and Smelter Workers. Jencks was convicted last year of lying in a non-Communist affidavit filed under the Taft-Hartley law.

As Matusow entered the courtroom he said he was "concerned about the citation—but I'm not going to let it worry me. I'm not going around with my head between my legs."

Matusow said, if he has to go to jail, he would "go with honor and great pride. I am not the real issue. The entire security system of the government is the real issue."

REDUCED AREA

Originally, the District of Columbia contained 100 square miles, but this was cut to 69 square miles in 1849, when the portion south of the Potomac was ceded back to Virginia.

THEY'LL HATCH OR BUST — Patricia Ann Godbee of Miami Beach, Fla., thinks she can hatch eggs as well as any old goose. And she's going to prove it or bust (the eggs). The 21-year-old is giving herself 29 days to become a

modern day "Mother Goose." She'll sit on nine eggs, without leaving them for more than four minutes at a time. At night, as shown at right, she'll turn the eggs just like a goose would do.

SOCIAL LION

LOWELL, Mich. (AP)—An animal's foot print excited so much interest in this western Michigan area that investigators made a

plaster cast of it—then learned from the Grand Rapids Public Museum it was that of a mountain lion.

Conservation men said it prob-

ably escaped from captivity somewhere.

Meditations for LENT

By DR. J. CARTER SWAIM
Dept. of English Bible,
National Council of Churches
Written for NEA Service

When James (1:14, RSV) tells us that "each person is tempted when he is lured and enticed by his own desire," he is not attempting a philosophical analysis of evil, but is trying to give a vivid description of a psychological process. It is as if each man were two men. It is as if human na-

ture were one thing, evil desire another. The latter is always trying to get the better of the former. Devious are the ways in which it operates. It both lures and entices.

These words describe the woodsman—whether hunter or fisherman—who stealthily goes about the business of trapping or catching his prey. First he must manage to get the prey away from the safety of its retreat. For this he uses a lure or decoy.

Falconers seek to lure hawks by means of feathers tied to a long cord. The next step is to entice the animal into the trap or the fish onto the hook.

This is done by some kind of bait which leads the victim to think he is getting one thing when he is really getting something else. Thus the baser part of our human nature lures and entices the better part. Proverbs 1:10 (RSV) says:

"My son, if sinners entice you, do not consent."

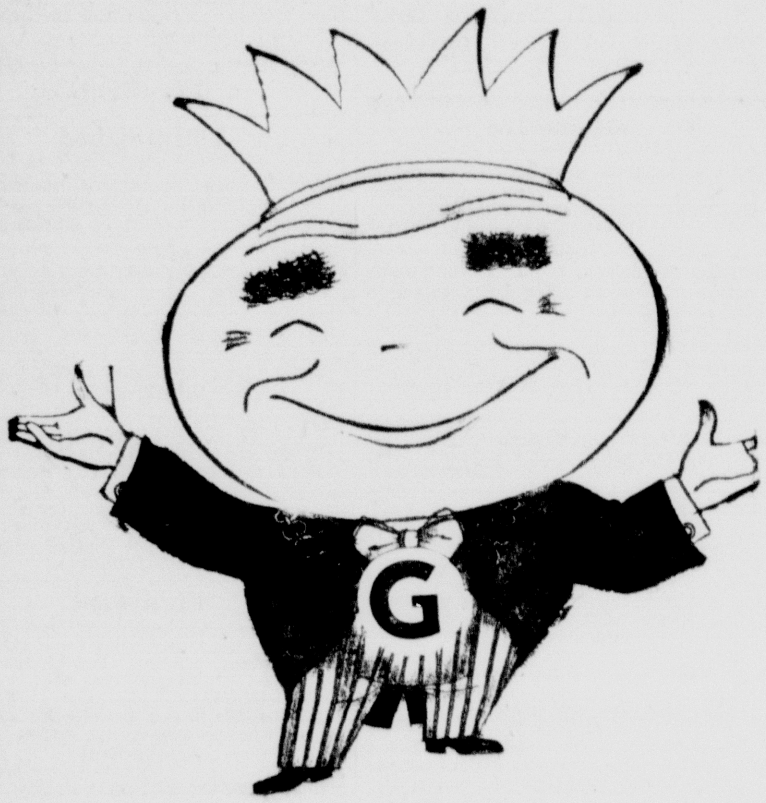

and then pictures the difference between man and the wild creatures:

"For in vain is a net spread in the sight of any bird; but these men lie in wait for their own blood."

They set an ambush for their own lives."

(Proverbs 1:17f, RSV)

The government and the weather get the blame when peoples' affairs are not going right.
